Use Cases Part 2

Active Use Case Pages

LD4L Use Cases - Describes Use Cases that are being addressed by LD4L.
Use cases from beyond LD4L - Describes potential Use Cases that may follow from the LD4L work, but are currently beyond the scope of LD4L.
Use Cases - Next Steps for Implementation - Describes active work on Use Cases for LD4L.

Historical Document - no longer active

Implementable user "stories", indicating which local and external data would be needed, the linked data angles, and the cross institution angles.

	(title)	end user	task	satisfied when	local data to support	why linked data?	cross-institution?	external data	notes
	End User Discovery								
1		student	find a recording of Stravinsky's Firebird Suite (1919 edition) • present user with indication that there are 1914 and 1919 editions of the suite, as well as recordings of the whole ballet	user can wayfind within 2 clicks to a list of recordings of the 1919 Suite, with the ability to select between physical and online recordings	marc records - music recordings ... including those in which the piece is not the main album title	granularity of non-marc record objects: whole ballet, 1914 and 1919 suites	could be	OCLC - lookup OCLC id and get addl info?	
2		student or faculty	find a recording of Stravinsky's Firebird Suite (1914 edition) conducted by Stravinsky and/or played by a Russian orchestra	user can wayfind to list of relevant recordings displaying conductor and performing orchestra information	" + performer (conductor and/or orchestra) info for each performance, main album title or not	object of interest might be secondary title on recordings; conductor and orchestra info might be external lookup	"	OCLC + music brainz or lastfm??	would also love recording date

								ORCID	
								LCSH	
								VIAF	
	Person + Bib data								
(6 from old list)	highlight my faculty's work	university dean	a. highlight content created by my faculty in the discovery interface b. also include departed faculty	i. content landing pages indicate local creator ii. can filter discovery by local institution creators		faculty profiles must be merged with bib data; disambiguation of person names	possibly do local institution person lookup on other institution's linked data?	ORCID, faculty profiles	
	(bib + curation data) Annotations /CULLR								

(11 from old list)		faculty	create a virtual collection discoverable by my students and by other faculty (that might be teaching this course later)	another user can view my virtual collection		annotation use case	virtual collection could include resources at other institutions?		
		student or faculty	annotate a physics paper; don't care if it's a preprint or an official publication		article level metadata for journals	recognizing the paper is the same in preprint and in the journal	arxiv.org	arxiv.org	revise to include faculty profile angle?
