Beta 3 Sprint : May 18-29

- Working on beta3
- Review DSpace 7 Release Plan spreadsheet for beta3 and beta4 tasks

This meeting is a short 30 minute check-in which will only involve reviewing of "PRs Needing Review". There will be no meeting on Thursday, May 21 as it's a public holiday in Belgium (so the Atmire team will be unavailable).

Agenda

- (30 mins) Quick check in & planning for next week
 - Assigning PRs for Review
 - (As necessary) claim tasks for next week from DSpace 7 Release Plan spreadsheet
- Tabled Topics (will not be discussed, but are just reminders of possible topics for May 28 meeting)
 - Finalize / approve the initial list of all authorization features which we should implement for the /api/authz/features REST endpoint. This list of features should be limited to only features which are required to enable/disable User Interface functionality. (In other words, we can always add more features in the future. We just need to approve the list necessary for 7.0)
 - 1. Review current spreadsheet (from Andrea Bollini (4Science)): https://docs.google.com/spreadsheets/d
 - /1182LcD_WqlZRbUGWpLtBw0aOMR9jhbOVB7GZqtTpR9A/edit?usp=sharing
 - a. Art Lowel (Atmire): I don't see any immediate issues with the current set of features, but I would prefer a consistent naming scheme. I'd use canDoSomething for everything
 - b. Tim Donohue added possible renames of these features based on Art's idea (see cell comments in spreadsheet). I like the "can[DoSomething]" naming scheme as well.
 - (Waiting on proposal for addressing side effects from Andrea Bollini (4Science)) Controlled Vocabularies and Authority Control in DSpace 7
 - 1. How to move forward on Controlled Vocabulary feature: https://github.com/DSpace/DSpace/pull/2743

Attendees

- Art Lowel (Atmire)
- Andrea Bollini (4Science)
- Tim Donohue
- Lieven Droogmans
- Giuseppe Digilio (4Science)
- Ben Bosman
- Paulo Graça

7.0 Release Goals

These resources define the prioritization and general schedule we are working towards

- DSpace 7 Release Goals: overview of goals/timelines & beta release process
- DSpace 7 Release Plan spreadsheet: our planning spreadsheet which details which features are scheduled for each Beta release.

Current Work

Claim a Ticket!

If you do not have access in JIRA or GitHub to officially claim the ticket you wish to work on, contact Tim Donohue

- Available Angular UI Tickets
 - Open issues in 7.0beta3 milestone (highest priority)
 - Open issues flagged as "Difficulty: low". These may be a good starting point for newer developers.
- Available REST API Tickets
 - Unassigned tickets scheduled for 7.0beta3 (highest priority)
 - General REST API tickets flagged as "low hanging fruit". These may be a good starting point for newer developers.
 - General REST API unassigned bug tickets. Again, might be a good starting point for newer developers.

Delayed / Needs Discussion

- 1. Initial Performance Testing from Chris. Needs revisiting / retesting prior to 7.0.
 - a. https://cwilper.github.io/dspace-perftest/
 - b. These performance tests were run prior to the work on "projections" (to limit the data returned by the REST API). Therefore, it is likely performance is much improved, but needs verification testing.
- 2. (REST Contract) Edit Homepage News: https://github.com/DSpace/Rest7Contract/pull/45
 - a. Delayed. General agreement (in meeting on March 21, 2019) that storing HTML in metadata fields is not really ideal behavior. Metadata (from a librarian standpoint) tends to be free of format-related markup (as that allows for easier sharing, understanding of metadata. Currently Community & Collection homepage information is HTML-based and is stored in metadata that is appropriate for a minor subset of information (like the title) but it is better to move large/rich text to bitstreams.
 - b. Proposal here is to consider storing HTML-based markup (for Site, Community & Collection homepages) in Bitstream(s) associated with the object in question. May allow for more CMS-lite behavior in the future
 - c. Timeline for this is uncertain. Possibly in 7 or 8. May depend on how/whether it can be scoped.
