Summary

DSpace 1.7.1 is a bug fix release to resolve any issues located within DSpace 1.7.0. As it only provides bug-fixes, DSpace 1.7.1 should constitute an easy upgrade from DSpace 1.7.0 for most users. No database changes or additional configuration changes should be necessary when upgrading from DSpace 1.7.0 to 1.7.1.

No new features in DSpace 1.7.1

1.7.1 is a bug-fix only release. This means it will include **no new features** and only includes fixes for bugs which were found in the 1.7.0 release.

For a list of all new 1.7 Features, please visit the DSpace Release 1.7.0 Notes.
