Basic Image Solution Pack

Overview

The Basic Image module adds the ability to create Basic Image collections, which are capable of displaying GIF, PNG and JPG/JPEG files. Users can view a compacted version of the image on the object's View tab, or click the image to view it full-size. It also allows for creation of a thumbnail image datastream during the ingest process.

Dependencies

• Core Collection Solution Pack

Release Notes and Downloads

Content Models, Prescribed Datastreams and Forms

The Basic Image Solution Pack comes with the following objects in http://path.to.your.site/admin/islandora/solution_packs:

- Islandora Basic Image Collection (islandora:sp basic image)
- Basic Image Collection (islandora:sp_basic_image_collection)

An image object created using the Basic Image Solution Pack's content model will have the following datastreams:

| RELS-EXT | Default Fedora relationship metadata |
|----------|--|
| MODS | MODS record, created at time of ingest |
| DC | Dublin Core record |
| OBJ | The original image file uploaded |

| TN | Thumbnail image, created at time of ingest |
|-------------|---|
| MEDIUM_SIZE | A compressed version of the image, used on the object's View page |

The Basic Image Solution Pack comes with the Basic image MODS form.
