

Admin UI - Trigger the re-index of a collection

Title (Goal)	Trigger the re-index of a collection
Primary Actor	Admin
Scope	
Level	
Story (A paragraph or two describing what happens)	An admin has initiated a change across a collection or community (facet change, bulk metadata update, collection move) and needs the discovery index to be in sync with this change. The admin can select a specific collection or community and trigger the refresh of the index.
