1. Islandora / F4 migration update
2. Open Repositories [committer meeting planning](#)
3. From last week: High-priority issues

- 
- The diagram illustrates various error messages encountered during macro execution, organized into categories based on audit issues:
- Audit issues:**
    - LDP**
      - a.** Unable to locate Jira server for this macro. It may be due to Application Link configuration.
      - b.** Unable to locate Jira server for this macro. It may be due to Application Link configuration.
      - c.** Unable to locate Jira server for this macro. It may be due to Application Link configuration.
    - Performance**
      - a.** GC error
      - b.** blank node
    - Clean up**
      - a.** Unable to locate Jira server for this macro. It may be due to Application Link configuration.
      - b.** Unable to locate Jira server for this macro. It may be due to Application Link configuration.
      - c.** Unable to locate Jira server for this macro. It may be due to Application Link configuration.

## Minutes

### Islandora/F4 migration

- Some migration-utils issues turned out to be difficult
  - Utility will maintain a list of mappings during migration
  - Currently no tooling to address URL redirects at the application level (e.g. redirecting a legacy F3 URL request to the new F4 URL)
    - Aaron plans on using a key-value store to handle the redirects
      - Use a service to do a lookup in the database and redirect to the new F4 URL
- [Pull request](#) to provide properties file to declare namespace prefixes before migration starts
  - Otherwise default namespaces get created (ns01, ns02, etc.)
  - Namespace prefixes can't be changed once created (as per [ModeShape](#)). But they can be remapped
  - Could build a separate utility
  - Andrew will create a ticket :

Unable to locate Jira server for this macro. It may be due to Application Link configuration.

### OR2015 conference planning

- PCDM - making sure our efforts are aligned
  - What aspects of PCDM are now implemented in Sufia? Do we all agree and plan to implement elsewhere accordingly?
  - Perhaps discuss over lunch?
  - Google Doc signup sheet? Doodle poll?
- Committers meeting
  - People should come with a plan to be actively involved in the discussions
  - [Agenda online](#)
  - Software dependencies
    - Packages, OSGi support, dependency chains, etc.
  - Migrations plans
    - When are people migrating?
    - What are the blockers?
