

# Test - Workflow Profile: Ingest

Profile for testing the addition of new [containers](#) and [binaries](#) to a repository.

★ Indicates a timed section.

1. Repeat for every container in the setup profile:
  - a. Add the container. ★
  - b. Add each binary for that container. ★
  - c. Add a property to the container. ★

Test with 1, 2, 4, and 8 threads.
