Users can purge items that have only been deleted locally from the "DDP Manager" view.

See: [AV] DDP Manager wireframe

[Delete](#) ▼

Purge

"Purge" only available if a work is in a DDP. Also limited by user role.

Where "Purge" stands for the function that would delete the work from the repository and the DDP.

Do you want to purge this work?

Purging a work removes it from the local repository and every DDP it is backed up to permanently.

Type "PURGE" below to confirm. The press "Yes" to proceed.

[Yes](#) [No](#)

Go to "Delete Request Status Page"

Update Hyrax "Delete" confirmation dialog to include a bit of help text to explain what is going on.

Are you sure you want to delete this work?

Deleting a work removes it from the local repository.
