DAMS Thing			
	Repository		<p>As a repository manager, I want to know all the collections and objects in the DAMS for which I have custodial responsibility.</p> <p>As a repository manager, I want to be able to update repository information in one place and be assured updates will be propagated to all relevant places.</p> <p>As a repository manager, I want to constrain curatorial access to my units assets to staff members of my unit and to DAMS managers having universal access.</p> <p>As a user, I want to list all the collections and objects in the DAMS that belong to a library unit.</p> <p>Allow user to contact repository.</p>
	DAMS Resource		
		Collection	<p>As the DAMS manager, I want to be able to list for browsing all formal collections represented in the DAMS and I want to list them with the appropriate relationships</p> <p>As a repository manager, I want to know all the collections for which I have curatorial responsibility.</p> <p>As a repository manager, I want to compose collections, limiting the collection to the items sharing the same provenance, limiting the collection to represent a part of a collection have a singular provenance, or assembly a collection from other collections and objects.</p> <p>As a repository manager, I want to say one collection is related to another collection. (TBD)</p> <p>As a repository manager, I want to describe a collection, including its title, its inclusive / bulk dates, its language(s), and many other aspects.</p> <p>As a repository manager, I want to indicate names (persons, families, corporate bodies) related to the collection either as creator, source, or subject.</p> <p>As a repository manager, I want to indicate subjects related to the collection.</p> <p>As a repository manager, I want to indicate other descriptions of the collection that are outside the DAMS and of probable importance to users</p> <p>As a repository manager, I want to know all events (typically, metadata and either subtraction or addition of collection members) occurring to a collection.</p> <p>As a user, I want to be able to browse by collections in the DAMS.</p> <p>As a user, I want to be able to limit my search to specified collection(s)</p>

		Object	<p>As a repository manager, I want know all the components belonging to an object.</p> <p>As repository manager, I want to know all the files belonging to an object</p> <p>As a repository manager, I want to describe an object, including its title, date(s), language(s), and other aspects.</p> <p>As a repository manager, I want to indicate names (persons, families, corporate bodies) related to an object.</p> <p>As a repository manager, I want to indicate subjects that are related to an object</p> <p>As a repository manager, I want to indicate the copyright status of an object.</p> <p>As a repository manager, I want to indicate any statutes pertinent to an object.</p> <p>As a repository manager, I want to indicate any license ζ pertinent to an object.</p> <p>As a repository manager, I want to indicate any other rights pertinent to an object.</p> <p>As a repository manager, I want to indicate any external versions or descriptions of an object that may be of probable importance to a user.</p> <p>As a repository manager, I want to know all events done to an object over the object's life cycle.</p> <p>As a DAMS manager, I want to know what repository an object belongs to.</p> <p>As a DAMS manager I want to know what collection(s) an object belongs to.</p> <p>As a user, I want to know what repository an object belongs to.</p> <p>As a user, I want to know what collection(s) an object belongs to.</p> <p>As a user, I want to see all the component parts of an object.</p> <p>As a user, I want to have access to the content files for an object.</p> <p>As a user, I want to know the rights status of an object (i.e., its copyright status and applicable statutes, licenses, and other rights).</p> <p>As a user, I want to know about other versions of the object or its metadata that might be of use to me.</p>
--	--	--------	--

		<p>Component</p>	<p>As a repository manager, I want to represent the physical and/or logical structure of an object.</p> <p>As a repository manager, I want to list all the components, in their appropriate order, for an object</p> <p>As a repository manager, I want to link, when appropriate, a component to another component or to a file.</p> <p>As a repository manager, I want to describe each component as necessary, including title, date(s), language(s), and other facets.</p> <p>As a repository manager, I want to indicate any name (person, family, or corporate body) that is pertinent to the component.</p> <p>As a repository manager, I want to indicate any subject that is pertinent to the component.</p> <p>As a repository manager, I want to indicate if the component has a copyright status different than that of the object as a whole.</p> <p>As a repository manager, I want to indicate if a statute pertains to the component, apart from the object as a whole.</p> <p>As a repository manager, I want to indicate if a license pertains to the component, apart from the object as a whole.</p> <p>As a repository manager, I want to indicate if other rights pertain to the component, apart from the object as a whole.</p> <p>As a repository manager, I want to know all events occurring to a component over its life cycle.</p> <p>As a DAMS manager, I want to present in their assigned order all components comprising an object.</p> <p>As a user, I want to be able to see and navigate the component hierarchy of an object.</p>
	<p>File</p>		<p>As a repository manager, I want to know all the content files in the DAMS for my repository's objects.</p> <p>As a repository manager, I want to associate a content file with either an object or an object component.</p> <p>As a repository manager, I want to know any event that occurred to a content file for any of my repository's objects.</p> <p>As a DAMS manager, I want to indicate to preservation managers aspects of a master file useful for monitoring its integrity, and impending obsolescence, including file size, creation date, file format and format version.</p> <p>As a DAMS manager, I want to indicate to preservation managers the checksum and checksum method for each master file for a given object.</p> <p>As a DAMS manager, I want to indicate the source-capture information for a file where it is useful to do so.</p> <p>As a DAMS manager, I want to know, via preservation managers, of any object for which integrity or authenticity is in question or that has been updated to a more current file format.</p> <p>As a user, I want access to content files that comprise an object.</p> <p>Allows the user to decide whether a file is too large to download.</p>

	Title		<p>As a repository manager, I want to provide a title, in all useful forms, for my repository's collections, objects, and object components.</p> <p>As a repository manager, I want to know any changes occurring to titles for repository's collections, objects, and object components.</p> <p>As a DAMS manager, I want to present collections, objects, and object components by title,</p> <p>As a user, I want to search collections, objects, and object components by title.</p>
	Origin Info		<p>As a repository manager, I want to indicate for an object or object component the place of publication, the publisher, edition, etc., when pertinent.</p> <p>As a repository manager, I want to know of any changes made to the origin Info for an object, including its component parts.</p> <p>As a user, I want to know for an object or its component parts the place of publication, the publisher, etc.</p>
	Date		
	Note		<p>As a repository manager, I want to describe various facets of a collection, object, or object component that are not addressable via title, date, name, and subject entities.</p> <p>As a repository manager, I want to know of all modifications made to notes for my repository's collections, objects, or object components.</p> <p>As a user, I want to know about various facets of a collection, object, or object component, such as scope and content, various identifiers, conditions governing use/access, etc.</p>
		ScopeContentNote	
		PreferredCitationNote	
		CustodialResponsibilityNote	
	Vocabulary		
	Vocabulary Entry		
		Language	<p>As a repository manager, I want to indicate the language(s) for present in a collection, object, or object component.</p> <p>As a repository manager, I want to know of any changes made to language(s) indicated for a collection, object, or object component.</p> <p>As a user, I want to scope my searches for collections, objects, or object components to a specific language.</p>
		Name	<p>As a repository manager, I want to register a name record for each unique identity associated with my repository's collections and objects</p> <p>As a user, I want to search by for collections and objects by name (person, family, or corporate body).</p>

		Role	<p>As a repository manager, I want to indicate that a name pertinent to a collection, object, or object component has a specific role, such as illustrator, photographer, etc.</p> <p>As a user, I want to scope by searches by name to a specific role such as illustrator, photographer, etc.</p>
		Subject	<p>As a repository manager, I want to indicate all subjects (title, genre/form, topic, geographical name, function, occupation, name, cartographics, etc.) that are pertinent to a collection, object, or object component.</p> <p>As a user, I want search for collections, objects, and object components by pertinent such headings, including title, topic, genre/form, geographical name, function, occupation, name, cartographics, etc.</p>
		Subject Part	
	Cartographics		<p>As a repository manager, I want to indicate the geo-coordinates for any resource (collection, object, object component) that believe useful to an end user.</p> <p>As a user, I want to see the geographical context of a collection, object, or object component, where pertinent.</p>
	Related Resource		<p>As a repository manager, I want to indicate all other pertinent versions or descriptions of a resource (e.g., collection, object, or object component) that are external to the DAMS.</p> <p>As a user, I want to know of all other pertinent versions or descriptions of the resource.</p>
	Checksum		<p>As a repository manager, I want to know if the checksum for any of my repository's content files that have changed.</p> <p>As a DAMS manager, I want to know, via the preservation manager, of all files for which the checksum has changed since last registered.</p>
		CRC32 Checksum	
		MD5 Checksum	
		SHA1 Checksum	
		SHA256 Checksum	
		SHA512 Checksum	
	Source-Capture		<p>As a repository manager, I want to know, where pertinent, the hardware and software used to generate a content file.</p>
	Rights		

		Copyright	<p>As a DAMS manager, I want to know what objects or object components are still under copyright and cannot be displayed without either a license or incurring risk.</p> <p>As a DAMS manager, I want to know when copyright for an object or object component is likely to expire per jurisdictional copyright statute.</p> <p>As a DAMS manager, I want to know when the copyright status for an object or object component is modified, either manually or automatically.</p> <p>As a user, I want to know if an object or object component is under copyright and, where possible, who the rights holder is.</p>
		Statute	<p>As a DAMS manager, I want to know all the statutes pertinent to an object or object component.</p> <p>As a DAMS manager, I want to know when the pertinence of a statute to a object or object component is scheduled to expire.</p> <p>As a DAMS manager, I want to know when the application of a statute to an object or object component has been modified, either manually or automatically.</p>
		License	As a DAMS manager, I want to know if copyrighted content has an applicable license.
			An actionable link to the documentation containing the license being applied
		Other Rights	<p>As a DAMS manager, I want to know if an object or object component is subject to a library policy that restricts access in any way.</p> <p>As a DAMS manager, I want to know when application of a library policy to an object or object component is scheduled to expire.</p> <p>As a DAMS manager, I want to know if application of a library policy to an object or object component has been modified, either manually or automatically.</p>
	Rights Action		<p>As a DAMS manager, I want to know all the uses for an object or object component that are permitted or restricted per the rights status of the object or object component.</p> <p>As a DAMS manager, I want know the dates for when a permission or restriction is active.</p> <p>As a DAMS manager, I want to know when permitted and restricted acts and/or their active dates are modified.</p>
		Permission	
		Restriction	

	Event		<p>As a DAMS manager, I want to track all events scheduled for recording in the DAMS.</p> <p>As a DAMS manager, I want to know the agent(s) responsible for carrying out an event.</p> <p>As a DAMS manager, I want to know when the event occurred.</p> <p>As a DAMS manager, I want to know the outcome of the event, e.g., object NN was deleted.</p> <p>Allows user to select categories of events.</p> <p>Allows user to identify timing, sequence, etc. of events.</p> <p>Describes purpose of the event.</p>
