

# DURASPACE™ Hosted Services

DuraSpace services are easy to use, quick to start up, and have simple, predictable pricing. Our services run on open source software to ensure that your content remains accessible and available over time.

## **archivesDIRECT** Hosted Archivematica

Offered in partnership with Artefactual Systems (the creators of Archivematica), ArchivesDirect is a fully hosted open-source software stack that allows customers to create standardized content packages for long-term preservation with secure, replicated storage. Includes automatic integration with DuraCloud and training from expert staff.

## **DSPACE DIRECT** Hosted DSpace Repository

A simple, low-cost hosted DSpace, the software of choice for open digital repositories. DSpaceDirect is an excellent way to start a new repository quickly, with DuraCloud preservation backup built in and the option to easily move to a more customized repository in the future.

## **Preservation Cloud Storage**

DuraCloud makes it easy to control where and how your organization preserves content in the cloud. DuraCloud enables your institution to store any content with expert cloud storage providers while adding lightweight features and integrations for automated fixity checks, data access, and automatic content syncing. Includes option for deposit in the Chronopolis TRAC-certified dark archive.
