Production Releases

Fedora 4.7.5

Release documentation

	Download	Description
Fedora 4.7.5 Vagrant	<ul style="list-style-type: none">GitHub	The complete suite of standalone Solr and Fuseki applications integrated with the Fedora web application
Fedora 4.7.5 Web Application	<ul style="list-style-type: none">WARGitHub	The main Fedora web application. Download the WAR or view the release on GitHub .
Fedora 4.7.5 One-click-run Application	<ul style="list-style-type: none">JARGitHub	A fully-functional, executable Fedora application bundled with Jetty servlet container. Download the executable or view the release on GitHub .
Fedora 4.7.5 Web Application with Authorization and Audit	<ul style="list-style-type: none">GitHub	The Fedora web application packaged with WebAC authorization and/or coupled with the Audit Service. View and download on GitHub .

Fedora 4.7.4

Release documentation

	Download	Description
Fedora 4.7.4 Vagrant	<ul style="list-style-type: none">GitHub	The complete suite of standalone Solr and Fuseki applications integrated with the Fedora web application
Fedora 4.7.4 Web Application	<ul style="list-style-type: none">WARGitHub	The main Fedora web application. Download the WAR or view the release on GitHub .
Fedora 4.7.4 One-click-run Application	<ul style="list-style-type: none">JARGitHub	A fully-functional, executable Fedora application bundled with Jetty servlet container. Download the executable or view the release on GitHub .
Fedora 4.7.4 Web Application with Authorization and Audit	<ul style="list-style-type: none">GitHub	The Fedora web application packaged with WebAC authorization and/or coupled with the Audit Service. View and download on GitHub .

Fedora 4.7.3

Release documentation

	Download	Description
Fedora 4.7.3 Vagrant	<ul style="list-style-type: none"> • GitHub 	The complete suite of standalone Solr and Fuseki applications integrated with the Fedora web application
Fedora 4.7.3 Web Application	<ul style="list-style-type: none"> • WAR • GitHub 	The main Fedora web application. Download the WAR or view the release on GitHub.
Fedora 4.7.3 One-click-run Application	<ul style="list-style-type: none"> • JAR • GitHub 	A fully-functional, executable Fedora application bundled with Jetty servlet container. Download the executable or view the release on GitHub.
Fedora 4.7.3 Web Application with Authorization and Audit	<ul style="list-style-type: none"> • GitHub 	The Fedora web application packaged with WebAC authorization and/or coupled with the Audit Service. View and download on GitHub.

Fedora 4.7.2

Release [documentation](#)

	Download	Description
Fedora 4.7.2 Vagrant	<ul style="list-style-type: none"> • GitHub 	The complete suite of standalone Solr and Fuseki applications integrated with the Fedora web application
Fedora 4.7.2 Web Application	<ul style="list-style-type: none"> • WAR • GitHub 	The main Fedora web application. Download the WAR or view the release on GitHub.
Fedora 4.7.2 One-click-run Application	<ul style="list-style-type: none"> • JAR • GitHub 	A fully-functional, executable Fedora application bundled with Jetty servlet container. Download the executable or view the release on GitHub.
Fedora 4.7.2 Web Application with Authorization and Audit	<ul style="list-style-type: none"> • GitHub 	The Fedora web application packaged with WebAC authorization and/or coupled with the Audit Service. View and download on GitHub.

Fedora 4.7.1

Release [documentation](#)

	Download	Description
Fedora 4.7.1 Vagrant	<ul style="list-style-type: none"> • GitHub 	The complete suite of standalone Solr and Fuseki applications integrated with the Fedora web application
Fedora 4.7.1 Web Application	<ul style="list-style-type: none"> • WAR • GitHub 	The main Fedora web application. Download the WAR or view the release on GitHub.
Fedora 4.7.1 One-click-run Application	<ul style="list-style-type: none"> • JAR • GitHub 	A fully-functional, executable Fedora application bundled with Jetty servlet container. Download the executable or view the release on GitHub.
Fedora 4.7.1 Web Application with Authorization and Audit	<ul style="list-style-type: none"> • GitHub 	The Fedora web application packaged with WebAC authorization and/or coupled with the Audit Service. View and download on GitHub.

Fedora 4.7.0

Release [documentation](#)

	Download	Description
Fedora 4.7.0 Vagrant	<ul style="list-style-type: none">GitHub	The complete suite of standalone Solr and Fuseki applications integrated with the Fedora web application
Fedora 4.7.0 Web Application	<ul style="list-style-type: none">WARGitHub	The main Fedora web application. Download the WAR or view the release on GitHub .
Fedora 4.7.0 One-click-run Application	<ul style="list-style-type: none">JARGitHub	A fully-functional, executable Fedora application bundled with Jetty servlet container. Download the executable or view the release on GitHub .
Fedora 4.7.0 Web Application with Authorization and Audit	<ul style="list-style-type: none">GitHub	The Fedora web application packaged with WebAC authorization and/or coupled with the Audit Service. View and download on GitHub .

Fedora 4.6.2

Release [documentation](#)

	Download	Description
Fedora 4.6.2 Vagrant	<ul style="list-style-type: none">GitHub	The complete suite of standalone Solr and Fuseki applications integrated with the Fedora web application
Fedora 4.6.2 Web Application	<ul style="list-style-type: none">WARGitHub	The main Fedora web application. Download the WAR or view the release on GitHub .
Fedora 4.6.2 One-click-run Application	<ul style="list-style-type: none">JARGitHub	A fully-functional, executable Fedora application bundled with Jetty servlet container. Download the executable or view the release on GitHub .
Fedora 4.6.2 Web Application with Authorization and Audit	<ul style="list-style-type: none">GitHub	The Fedora web application packaged with WebAC authorization and/or coupled with the Audit Service. View and download on GitHub .

Fedora 4.6.1

Release [documentation](#)

	Download	Description
Fedora 4.6.1 Vagrant	<ul style="list-style-type: none">GitHub	The complete suite of standalone Solr and Fuseki applications integrated with the Fedora web application
Fedora 4.6.1 Web Application	<ul style="list-style-type: none">WARGitHub	The main Fedora web application. Download the WAR or view the release on GitHub .
Fedora 4.6.1 One-click-run Application	<ul style="list-style-type: none">JARGitHub	A fully-functional, executable Fedora application bundled with Jetty servlet container. Download the executable or view the release on GitHub .

Fedora 4.6.1 Web Application with Authorization and Audit	<ul style="list-style-type: none"> • GitHub 	The Fedora web application packaged with WebAC authorization and/or coupled with the Audit Service. View and download on GitHub .
---	--	---

Fedora 4.6.0

Release [documentation](#)

	Download	Description
Fedora 4.6.0 Vagrant	<ul style="list-style-type: none"> • GitHub 	The complete suite of standalone Solr and Fuseki applications integrated with the Fedora web application
Fedora 4.6.0 Web Application	<ul style="list-style-type: none"> • WAR • GitHub 	The main Fedora web application. Download the WAR or view the release on GitHub .
Fedora 4.6.0 One-click-run Application	<ul style="list-style-type: none"> • JAR • GitHub 	A fully-functional, executable Fedora application bundled with Jetty servlet container. Download the executable or view the release on GitHub .
Fedora 4.6.0 Web Application with Authorization and Audit	<ul style="list-style-type: none"> • GitHub 	The Fedora web application packaged with WebAC authorization and/or coupled with the Audit Service. View and download on GitHub .

Fedora 4.5.1

Release [documentation](#)

	Download	Description
Fedora 4.5.1 Vagrant	<ul style="list-style-type: none"> • GitHub 	The complete suite of standalone Solr and Fuseki applications integrated with the Fedora web application
Fedora 4.5.1 Web Application	<ul style="list-style-type: none"> • WAR • GitHub 	The main Fedora web application. Download the WAR or view the release on GitHub .
Fedora 4.5.1 One-click-run Application	<ul style="list-style-type: none"> • JAR • GitHub 	A fully-functional, executable Fedora application bundled with Jetty servlet container. Download the executable or view the release on GitHub .
Fedora 4.5.1 Web Application with Authorization and Audit	<ul style="list-style-type: none"> • GitHub 	The Fedora web application packaged with WebAC authorization and/or coupled with the Audit Service. View and download on GitHub .

Fedora 4.5.0

Release [documentation](#)

	Download	Description
Fedora 4.5.0 Vagrant	<ul style="list-style-type: none"> • GitHub 	The complete suite of standalone Solr and Fuseki applications integrated with the Fedora web application

Fedora 4.5.0 Web Application	<ul style="list-style-type: none"> • WAR • GitHub 	The main Fedora web application. Download the WAR or view the release on GitHub.
Fedora 4.5.0 One-click-run Application	<ul style="list-style-type: none"> • JAR • GitHub 	A fully-functional, executable Fedora application bundled with Jetty servlet container. Download the executable or view the release on GitHub.
Fedora 4.5.0 Web Application with Authorization and Audit	<ul style="list-style-type: none"> • GitHub 	The Fedora web application packaged with WebAC authorization and/or coupled with the Audit Service. View and download on GitHub.

Fedora 4.4.0

Release [documentation](#)

	Download	Description
Fedora 4.4.0 Vagrant	<ul style="list-style-type: none"> • GitHub 	The complete suite of standalone Solr and Fuseki applications integrated with the Fedora web application
Fedora 4.4.0 Web Application	<ul style="list-style-type: none"> • WAR • GitHub 	The main Fedora web application. Download the WAR or view the release on GitHub.
Fedora 4.4.0 One-click-run Application	<ul style="list-style-type: none"> • JAR • GitHub 	A fully-functional, executable Fedora application bundled with Jetty servlet container. Download the executable or view the release on GitHub.
Fedora 4.4.0 Web Application with Authorization and Audit	<ul style="list-style-type: none"> • GitHub 	The Fedora web application packaged with authorization (WebAC, role-based, or XACML) and/or coupled with the Audit Service. View and download on GitHub.

Fedora 4.3.0

Release [documentation](#)

	Download	Description
Fedora 4.3.0 Vagrant	<ul style="list-style-type: none"> • GitHub 	The complete suite of standalone Solr and Fuseki applications integrated with the Fedora web application
Fedora 4.3.0 Web Application	<ul style="list-style-type: none"> • WAR • GitHub 	The main Fedora web application. Download the WAR or view the release on GitHub.
Fedora 4.3.0 One-click-run Application	<ul style="list-style-type: none"> • JAR • GitHub 	A fully-functional, executable Fedora application bundled with Jetty servlet container. Download the executable or view the release on GitHub.
Fedora 4.3.0 Web Application with Authorization and Audit	<ul style="list-style-type: none"> • GitHub 	The Fedora web application packaged with either role-based or XACML authorization and/or coupled with the Audit Service. View and download on GitHub.
Camel Integration Web Application	<ul style="list-style-type: none"> • WAR • GitHub 	The Camel Integration web application provides support for Apache Camel routes that publish to Solr and/or a triplestore. Download the WAR or view on GitHub.

Fedora 4.2.0

Release [documentation](#)

	Download	Description
Fedora 4.2.0 Vagrant	<ul style="list-style-type: none">• GitHub	The complete suite of standalone Solr and Fuseki applications integrated with the Fedora 4.2.0 web application
Fedora 4.2.0 Web Application	<ul style="list-style-type: none">• WAR• GitHub	The main Fedora 4.2.0 web application. Download the WAR or view the release on GitHub.
Fedora 4.2.0 One-click-run Application	<ul style="list-style-type: none">• JAR• GitHub	A fully-functional, executable Fedora 4.2.0 application bundled with Jetty servlet container. Download the executable or view the release on GitHub.
Fedora 4.2.0 Web Application with Authorization and Audit	<ul style="list-style-type: none">• GitHub	The Fedora 4.2.0 web application packaged with either role-based or XACML authorization and/or coupled with the Audit Service. View and download on GitHub.
Camel Integration Web Application	<ul style="list-style-type: none">• WAR• GitHub	The Camel Integration web application provides support for Apache Camel routes that publish to Solr and/or a triplestore. Download the WAR or view on GitHub.

Fedora 4.1.1

Release [documentation](#)

	Download	Description
Fedora 4.1.1 Web Application	<ul style="list-style-type: none">• WAR• GitHub	The main Fedora 4.1.1 web application. Download the WAR or view the release on GitHub.
Fedora 4.1.1 One-click-run Application	<ul style="list-style-type: none">• JAR• GitHub	A fully-functional, executable Fedora 4.1.1 application bundled with Jetty servlet container. Download the JAR or view the release on GitHub.
Fedora 4.1.1 Web Application with Authorization	<ul style="list-style-type: none">• GitHub	The Fedora 4.1.1 web application packaged with either role-based or XACML authorization. View and download on GitHub.
JMS Message Consumer	<ul style="list-style-type: none">• GitHub	The JMS message consumer can be used to populate an external index (e.g. a triplestore). View and download on GitHub.
Camel Component	<ul style="list-style-type: none">• OSGi-bundle• GitHub	The Camel component provides support for Apache Camel routes. Download the OSGi bundle or view on GitHub.

Fedora 4.1.0

Release [documentation](#)

	Download	Description
--	----------	-------------

Fedora 4.1.0 Web Application	<ul style="list-style-type: none"> • WAR • GitHub 	The main Fedora 4.1.0 web application. Download the WAR or view the release on GitHub.
Fedora 4.1.0 One-click-run Application	<ul style="list-style-type: none"> • WAR • GitHub 	A fully-functional, executable Fedora 4.1.0 application bundled with Jetty servlet container. Download the WAR or view the release on GitHub.
Fedora 4.1.0 Web Application with Authorization	<ul style="list-style-type: none"> • GitHub 	The Fedora 4.1.0 web application packaged with either role-based or XACML authorization. View and download on GitHub.
JMS Message Consumer	<ul style="list-style-type: none"> • GitHub 	The JMS message consumer can be used to populate an external index (e.g. a triplestore). View and download on GitHub.
Camel Component	<ul style="list-style-type: none"> • OSGi-bundle • GitHub 	The Camel component provides support for Apache Camel routes. Download the OSGi bundle or view on GitHub.

Previous Releases

For the latest, stable Fedora 3.x release, see the [Fedora 3.x Downloads](#) page.

Snapshot Releases

Pre-compiled, nightly snapshots can be downloaded from artifacts published to the [Sonatype snapshot repository](#).

Development

The latest code is available on GitHub:

<https://github.com/fcrepo4/fcrepo4/>

We use Maven 3 to build Fedora 4. You can compile Fedora 4's artifacts by running:

```
$ mvn clean install
```

from the root of the git repository.
