Welcome to the LD4P2 website

New: Stanford Libraries announces Linked Data for Production (LD4P) cohort members and subgrant recipients

With support from the Andrew W. Mellon Foundation, the Linked Data for Production Phase 2 (LD4P2) partners (Cornell University, Harvard University, the Library of Congress, Stanford University, and the University of Iowa), in collaboration with the Program for Cooperative Cataloging (PCC), are building a pathway for the cataloging community to begin shifting to linked data to describe library resources. LD4P2 builds on the foundational work of [Linked Data for Production \(LD4P\) Phase 1](#) and [Linked Data for Libraries Labs \(LD4L Labs\)](#). More on LD4P2 [Project Background and Goals](#).

[user LD4P2 Roster](#) (view-only, opens in new tab)

We're hiring

Stanford University and LD4P2 are looking for a [Wikimedian-in-Residence](#).

LD4P2 team

resources

- [October 2018 in-person meetings](#)
- [internal Google drive](#)
- [public Google drive](#)
- [monthly all-hands call notes](#)
- [how to set up new team members](#)
- [LD4P2 communication and documentation strategy](#)

LD4P2 Work Areas

1. [Cloud-based environment for original metadata creation \(WP1\)](#)
2. [Metadata reuse \(WP2\)](#)
3. [Linkage to external authorities and web context data \(WP3\)](#)
4. [Discovery \(WP4\)](#)
5. [Production workflows for native linked data descriptions \(WP5\)](#)
6. [Community Collaboration \(WP6\)](#)
