

Linked Data for Production: Pathway to Implementation (LD4P2)

News

Stanford University and LD4P2 are looking for a [Wikimedian-in-Residence](#)

Cohort Corner

- Sinopia training plan for Cohort
- Cohort plans
- Cohort announcement
- Cohort In-Person Meeting #1 (Oct 2018)

Work Areas

Sinopia: Cloud-based cooperative cataloging environment

- Sinopia Homepage
- Sinopia Development Demos
- Sinopia User Group meeting notes
- Profiles Working Group
- Questions about LC's BF editor (*not* Sinopia!)

Lookups and External Data

- Wikidata work (Github)
- Wikimedian areas of focus

Discovery

- Discovery Affinity Group

Communication and Organization

Calendar

Team Calendars

Community

2019 LD4 Conference (May 10-11)

- Program Committee internal docs
- Planning docs (for Partners)

Overview

- Communication strategy

Communication Channels

- user LD4P2 Roster
- Join LD4 public Slack
- Mailing lists
 - ld4p2 (partners)
 - ld4pcohort (subgrantees)
 - ld4p2-sinopia-profile-wg (Profile Working Group)
 - ld4-discovery (Discovery Affinity Group)

Working Docs

- new LD4P Google slide template
- Public Google drive
- Private Google drive for partners
- Github organization

Working Groups and Affinity Groups

- [How to start a group](#)
- Profiles Working Group
- Discovery Affinity Group

How to

- Watch for changes
- Set up new team members

With support from the Andrew W. Mellon Foundation, the Linked Data for Production Phase 2 (LD4P2) partners (Cornell University, Harvard University, Stanford University, and the University of Iowa's School of Library and Information Science), in collaboration with the Library of Congress and the Program for Cooperative Cataloging (PCC), are building a pathway for the cataloging community to begin shifting to linked data to describe library resources. LD4P2 builds on the foundational work of Linked Data for Production (LD4P) Phase 1 and Linked Data for Libraries Labs (LD4L Labs). More on LD4P2 [Project Background and Goals](#).
