## Notes

### 2. b. Collection Extensions update (Lynette Rayle)

- PR created to merge collection extensions work into master – <https://github.com/samvera/hyrax/pull/2623> .
- Documentation for collection extensions functionality – [Collections and Admin Sets - Overview](#)– in addition to overview, see also documentation on collection types – <http://samvera.github.io/collection-types.html> .
- Wiki page to sign up for QA testing and bug fixing – [Hyrax 2.1.0 - QA and Release](#) .
- Props from the community to [Lynette Rayle](#) for her work on the documentation and to [Julie Rudder](#) for her work on the release process.

### 2. c. Hyrax PR reviewing (Chris Colvard)

- There are some Hyrax PR's that have been languishing for a while.
- Developers are encouraged to review the Github Hyrax Code Reviewers list – <https://github.com/orgs/samvera/teams/hyrax-code-reviewers/members>– and update it as appropriate. [Chris Colvard](#) will email the samvera-tech list about this as well.
- Discussion about increasing throughput on Hyrax PR reviews
  - Perhaps post outstanding PR's as an agenda item on the tech call as a place to talk about them during the call?
  - Would it be worthwhile to spend some time in a call looking at a PR together as an exemplar of how to do code review? Or perhaps this should be separated out into its own call for a time or two?
  - Would be good to have at least a basic checklist for code reviewing. Does anything exist that could be a starting point? Some suggestions ...

    - <https://github.com/samvera/hyrax/blob/master/.github/CONTRIBUTING.md#reviewing-and-merging-changes>
    - <https://samvera.github.io/best-practices-coding-styles.html>
    - <https://samvera.github.io/how-to-pr.html>
  - [Trey Pendragon](#) created an issue for [samvera.github.io](https://samvera.github.io) about documentation for how to review a PR – <https://github.com/samvera/samvera.github.io/issues/193> . Will tag common code reviewers to comment on the issue to offer suggestions about what should be in the documentation.
  - Good article on code reviewing: <https://medium.com/@sandya.sankarram/unlearning-toxic-behaviors-in-a-code-review-culture-b7c295452a3c> .
  - Discussed idea of matching reviewers with code areas they feel comfortable reviewing so that PR submitters could potentially tag appropriate people as reviewers. Might be a good idea but is likely to be difficult to maintain. Alternatively, PR submitters could use 'git blame' to get a sense of who has done work on the code in question and might be a good reviewer.
  - What is our goal in reducing the PR backlog? If outstanding for over a week, it really should be reviewed (unless it's clearly a work-in-progress PR).
  - [Jim Coble](#) will add an agenda item to next week's call to check in on how some of these plans are progressing.

### 3. Next week

- Moderator: [Jim Coble](#)
