

Hyrax Analytics Documentation Planning

What forms of documentation might be useful for Hyrax Analytics?

- Documentation tied to the UI functionality, as represented by the mockups
- Instructions on how to configure Hyrax Analytics for specified data channels (Google Analytics, Piwik, server-side)
- Information on how various data points in the reporting modules are calculated/aggregated from raw data
- Guidance or resources on potential user data privacy considerations

Audiences and Expectations

- General community (Hyrax implementers and digital library customers)
- Repository Managers group
- Developers
- Visitors to samvera.github.io

Next Steps

- Prioritize needed documentation
- Recruit desired SMEs from HAWG and broader community
- Charter group
- Plan work cycle in cooperation with development and QA efforts
