

Documentation Effort - interviews and reorganization of site

Use of Ryan's time

- Coordinate a pilot of small scale documentation sprint.
 - Documentation approaches

 - Option 2: Domain expert does a brain dump in writing. Documentor refines this and asks more questions through email /slack to add details and refine writing.
 - Option 3: Documentation webinar interview with all participants being able to ask clarifying questions. Provide some questions ahead of time.
 - Option 4: Documentor creates questionnaire to send to domain expert.
 - Option 5: New developer creates documentation as they think it works and then the domain expert helps to refine it until correct.
 - Coordination
