Meeting Minutes

1. Updates
 1. UF
 1. Moving forward on the release of Harvester 1.2
 2. File harvest
 2. Cornell
 1. Largely on track for the code freeze, Wednesday next week.
 3. Duke
 1. Waiting on vivo 1.3 for production.
 2. developing locally on a checkout from trunk.
2. Concerns requests
 1. D2RMAP and other package license adherence
 1. Review the third party licenses
 1. Categorize
 2. Comply with requirements
 2. Datamapping
 1. Data-type formerly significant to single sign on.
 3. Sourceforge alternatives
 1. With eclipse indigo Git is better supported with egit
 1. <http://www.eclipse.org/indigo/>
 2. U CO will be using a local group git repo.
 4. Jena issues
 1. Performance remains a concern
 2. Another group used Jena switched to *Virtuoso* and is till not completely happy but wouldn't switch back to Jena.
 3. there was a suggestion of *4store* and the developers there have move on to developing *5store*
