

Use Case 1.2 - UI Mockup - Catalog Search Results with Add to Library Virtual Collection

Planning | Description | Requirements | **UI Mockup** | Triples

The screenshot shows the Cornell University Library search results page for 'Mechanical Engineering'. The page features a red header with the library logo and navigation links. A search bar at the top right shows 'Selected Items (100)' and 'Search History'. The main content area displays a list of search results, each with a book icon, title, and details. A dropdown menu is open over the search bar, showing options to 'Add to New Virtual Collection' and listing various collections like 'My Virtual Collection', 'Archery Technique Reading List', 'Engineering Handbooks (published)', and 'Engineering Manuals (published)'. A yellow callout box explains that clicking on 'Engineering Handbook' will add selected works to that virtual collection. Another yellow callout box points to a 'Click here to see changes to individual work page' link. The left sidebar contains filters for 'Expand your search', 'Refine your results', and various categories like 'Access', 'Format', 'Author/Creator', etc. The bottom of the page shows pagination controls.

Engineering Manuals (published)

Selected Items (100) Search History
Click Engineering Handbook to add all selected works to that Library Virtual Collection. Combo selection is grayed out if no items are selected. All collections above the line are personal. Collections below the line are Library Virtual Collections. This only shows up when a librarian is logged in.
