Notes

2b. The future of OM (Tom Johnson)

- Initially, no one stepped forward to serve as Product Owner for OM (Opinionated Metadata – <https://github.com/samvera/om>). A proposal was made to deprecate it. However, it is a dependency for hydra-works and thus for Hyrax.
- There is a Product Owner for OM ([Jon Cameron](#)). Should we continue to move toward deprecation or find a way to drum up maintenance energy for it?
- There is a pull request for hydra-works to remove the OM dependency – <https://github.com/samvera/hydra-works/pull/346> . Should this move forward?
- Do we know how much OM is still used in the wild?
- Next steps
 - Find a viable alternative to OM.
 - Have someone try out the alternative in an app that uses OM.
 - Document the migration path from OM to the alternative.
- Will keep on agenda for next time.
- [Chris Colvard](#) will talk to [Jon Cameron](#) (the OM Product Owner) about this.

2c. Hyrax Working Group update (steve and Tom)

- Hyrax Working Group is a group of developers working on maintenance and features for Hyrax. In their first sprint. Expect to make a release at the end of the week.
- Current sprint has been mostly open-ended. Next sprint will focus on accessibility issues.
- Slack channel for the working group: #hyrax-wg .

2d. Heading toward Questioning Authority release (Lynette Rayle)

- Lynette has some pending QA PR's that she would like to get reviewed so she can make a new release. One of them – https://github.com/samvera/questioning_authority/pull/167– addresses a security vulnerability.
- [Justin Coyne](#) also has a pending QA PR that is failing tests. [Lynette Rayle](#) will reach out to him about whether it should be included in the release.
- [Kevin Musiorski](#) will finish up his review of https://github.com/samvera/questioning_authority/pull/167 today.

3. Next time:

- Moderator: [Kevin Musiorski](#)
- Notes: [Tom Johnson](#)
