

Must Cover Topics for Hydra Connect 2

The Hydra Connect Program Committee has started formulating the program for Hydra Connect in the fall and we want your help! Please add to the list below of must cover topics for Hydra Connect that could be covered by presentations, lightning talks, posters, working groups, workshops, etc. Let's make this the best Hydra meeting ever!

Key for Format and Audience Type

WS = workshop PL = plenary LT = lightning talk PR = presentation (say 20 mins) WG = Work group (Friday) PS = Poster	NPA = New and prospective adopters MGR = established managers DEV = established developers OTH = other
--	---

Possible Topics

Subject matter	Suggested format(s)	Suggested track (optional)	Suggested By
EAD/discovery layers (bEADI)			Adam Wead
Integration with ArchivesSpace (HAWG)			Ben Goldman
Archival repo services (ASphere, Hypatia)			Ben Goldman
Hydra for (new) managers	WS	NPA	Chris Awre
Hydra for DevOps	WS (2 hours)		Erin Fahy
Fedora 4 / Hydra test drive, and roadmap planning	WS (2 hrs - Half day)		Duraspace
Working with RDF in Hydra	WS		
GeoData	WS		
Intro to Rails	WS	NPA	
State of the HydraSphere	PL	All	
One Year with Hydra: what we know now; what we wish we knew earlier	PL/LT	All	Linda Newman
Sufia Futures (works, fedora 4, etc.)	WG		Mike Giarlo
Hydra RDF Working Group (check in and reinvigorate effort)	WG		Mike Giarlo
Common approaches to service management for an implemented Hydra head (e.g., ScholarSphere, Stanford Digital Repository, etc.) - what if we could come up with requirements for a service manager toolkit? Or some such.	MGR		Patricia Hswe
Hydra UX - how is the Hydra community engaging users of their products as they're being developed and maintaining that outward-facing perspective as a service is launched and evolves? What are common methods/tools/approaches we could be sharing and putting out there for others to test out/critique/adopt?	WG, PS		Patricia Hswe
Mediated deposit approaches/workflows - where do you start, and what are the critical paths for building this arm of a Hydra-based service, especially if one already has the self-deposit component well in place?	WG		Patricia Hswe
Metadata workflows/management and Hydra - I'm interested in hearing folks' ideas on this and getting an overview of how the community is addressing it.			Patricia Hswe
Strategic hiring and position development for Hydra shops in libraries. What kinds of roles are emerging or being re-cast/re-thought as the result of expanded, deepening commitment to a Hydra infrastructure at academic libraries?	LT		Patricia Hswe
Introducing the out of the box solutions: Sufia, Hydramata, Worthwhile, Avalon	PL? WS?	NPA	Justin
Building Hydra-Works (possibly extracting from Worthwhile/Hydramata)	WG/WS?	DEV	Justin
How do we migrate to Fedora 4	PL	All	Justin
Dive into Hydra	WS	NPA/OTH	Nathan Tallman
How to manage agile development	WS	MGR	Karen Cariani
How to manage a hydra project (may be similar to Patricia's suggestion)	WS	MGR	Karen Cariani
What is Fedora? and why is Fedora 4 a good option for my needs? (why should i migrate?)	PL	NPA	Karen Cariani
HydraDAM and WGBH's new workflow for media preservation	PS	NPA/MGR	Karen Cariani
Migration of a hydra head - what to expect, what to look out for	WS	MGR/DEV	Karen Cariani
