Give DSpace a test run before you install it!

<http://demo.dspace.org> is a live installation of the latest version of DSpace software.

This demo site is configured such that the maximum number of DSpace features is enabled, so that you can get a sense of all the various things that DSpace can do. We provide a variety of public logins (for various DSpace "roles") in the introductory paragraph of the [XMLUI](#) and [JSPUI](#) demo interfaces.

Want to get involved?

Looking for ways to help out? Or, have ideas that you really want to see implemented in DSpace? See our guide on [How to Contribute Ideas / Code / Documentation](#) for some ways you can help make DSpace better for everyone!

If you are a developer and want to get your feet wet with DSpace, consider trying to tackle one of our [unresolved, "low hanging fruit" tickets](#). They should be approachable to anyone who is newer to DSpace, and it'd be a great way to give back!
