## Scope & Objectives

The goal of this technical working group is to design and implement DSpace 7 Configurable Entities, per the [statement from the DSpace Steering Group regarding the DSpace 7 data model](#) and [proposal #3 of the DSpace Entities Working Group summary document](#). (A high level overview of "Configurable Entities" was also presented during the [DSpace 7 Update at OR2018](#).)

This working group is expected to complete and/or scope the effort within the DSpace 7 release timeline, which will require close coordination with the [DSpace 7 Working Group](#).

## Deliverables

This working group will

1. (*Before end of September*) Assess the [early prototype of Configurable Entities](#) and its alignment with guidelines/needs.
2. (*Before end of October*) Define an implementation roadmap for DSpace 7 Configurable Entities (based on the assessment of early prototype)
3. (*November to February*) Implement Configurable Entities, per defined roadmap (by creating a Pull Request & documentation, to be reviewed by [DSpace 7 Working Group](#) and [DSpace Committers](#))
4. Draft a post-DSpace 7 roadmap for Configurable Entities (to be reviewed by Steering and Leadership)

**Once the above deliverables have been completed, this working group will merge with the [DSpace 7 Working Group](#).** At that point, the Configurable Entities feature (and any further enhancements/improvements) will be managed by the combined [DSpace 7 Working Group](#), where it will be stewarded into DSpace 7.
