

# 2018-06-13 - API Spec Meeting

Time/Place

- Time: 2:30pm Eastern Time US
- Zoom: <https://duraspace.zoom.us/my/fedora>

## Attendees

[blocked URL](#) (facilitator)

[blocked URL](#)(notetaker)

- [Benjamin Armintor](#)
- [Esmé Cowles](#) [blocked URL](#)
- [Daniel Lamb](#)
- [Simeon Warner](#) [blocked URL](#)
- [Andrew Woods](#)

## Agenda

1. Review PRs
  - a. Fixing link to test suite <https://github.com/fcrepo/fcrepo-specification/pull/374>
2. Fixity sidecar
  - a. See <https://github.com/fcrepo/fcrepo-specification/issues/373>
3. Release a second draft recommendation?

## Notes

1. Review PR: waiting for Ben's +1
  - a. merged
2. Fixity sidecar
  - a. Reconciling various existing HTTP headers with the desire for a 1-request fixity process seems hard to do
  - b. There is a draft of a Memento-style fixity service, which seems like a good option to explore
    - i. <https://docs.google.com/document/d/1ws1x7bry3RqB305Xxtqlgru5c8heTDDk03jkbCA7iW4/edit>
  - c. Working on that as a sidecar spec makes sense to avoid scope creep or raising the bar for implementations
  - d. Process: people advocating for fixity service should participate in drafting the sidecar spec, possibly adjusting the membership of the spec editors' group
3. New draft release
  - a. There aren't any issues we'd like to address before 1.0, so we're really just waiting for implementations and TCK
  - b. What should we call it?
    - i. Beta/Release Candidate? We think it's complete, but still open to comments from implementations about whether the spec is implementable
    - ii. Previous docs called it "Candidate Recommendation", so that seems to be a good idea
    - iii. ReSpec controls the exact display, so we may need to work within what it allows
4. Action Items:
  - a. [Esmé Cowles](#): share Memento-style doc and comment on #373 that it should be a sidecar spec
  - b. [Simeon Warner](#): do another review, then create PR to update title
  - c. [Andrew Woods](#): publish new CR and publicize
