- We are changing references to "Fedora 4" to just "Fedora" and not putting in the 5.
- We are leaving references to "fcrepo4-data" alone.

Status	Who?	Page	History	Notes
blocked URL	Reviewed: Joshua Westgard Closed: Kevin Ford	Quick Start	2018-06-13: removed all the '4's (Joshua Westgard)	Joshua Westgard : This page may need another pass once a release candidate is ready, to verify the deployment requirements (such as required Java and Tomcat versions).
blocked URL	Yinlin Chen	Deployment Tooling		Kevin Ford : Will the elements on this page be ready/available when 5.0 arrives? If not, is it possible to suppress the page until they are or should we put a big notice near the top or delete altogether? Danny Bernstein : It probably won't be ready by the 5.0 launch (unless we delay it until after the second sprint). TBD. Yinlin Chen Pending vagrant update
	Revised: Kevin Ford Closed: Danny Bernstein	• Deploying Fedora - Complete Guide		Kevin Ford : I mainly changed all instances of "Fedora 4" to "Fedora 5." The information looks accurate and I don't think anything will change with the 4-to-5 upgrade, but this should be reviewed by someone more schooled in the internals than I. Delete this note when done, please. Danny Bernstein : I updated "Fedora 5" to "Fedora" since we're moving away from having the major version in the product name. Otherwise looks good.
blocked URL	Kevin Ford	Feature Tour		Kevin Ford : I have a replacement for the second image on the page but I do not seem to have the requisite permission to upload it. (Or I couldn't figure out how to.)
	Revised: Kevin Ford Closed: Danny Bernstein	• Feature Tour - Action - Create Resource		Danny Bernstein : 2018-06-13: reviewed, looks good.

		Optional - Audit Service		
		Audit Events for External Processes		
blocked URL		Optional - OAI-PMH Provider		Kevin Ford: This page was last relevant for Fedora 4.4 and carries a notice at the top of this fact. Should the page even remain? Danny Bernstein: I would say yes since there is a chance someone will be inspired to updated the module. A note welcoming a volunteer to help us improve the software here might be a good idea.
