2018-07-19 - Fedora Tech Meeting

Time/Place

This meeting is a hybrid teleconference and slack chat. Anyone is welcome to join...here's the info:
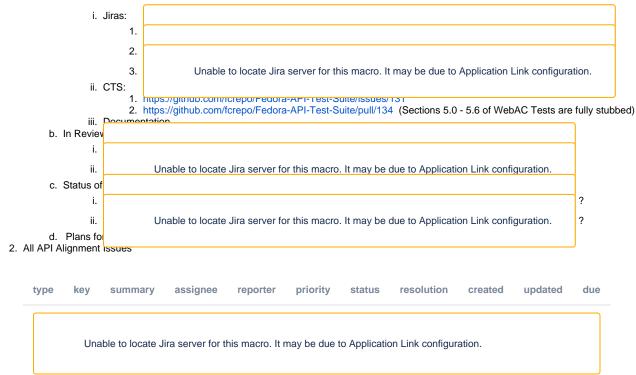

- Time: 11:00am Eastern Daylight Time US (UTC-4)
- Audio/Video Conference Link: https://duraspace.zoom.us/my/fedora
  - Dial-in:
    +1 408 638 0968
    +1 646 876 9923
    +1 669 900 6833
    Meeting ID:
    812 835 3771
- Join fedora-project.slack.com on the "tech" channel

Attendees

- Peter Eichman
- Andrew Woods
- Jared Whiklo
- Ben Pennell
- James Silas Creel ⭐

Agenda

1. Fedora 5.0.0 Preparation Tasks
    a. Work completed since last Thursday:

        i. Jiras:

            1.

            2.

            3.   Unable to locate Jira server for this macro. It may be due to Application Link configuration.

        ii. CTS:

            1. https://github.com/fcrepo/Fedora-API-Test-Suite/issues/131
            2. https://github.com/fcrepo/Fedora-API-Test-Suite/pull/134 (Sections 5.0 - 5.6 of WebAC Tests are fully stubbed)

        iii. Documentation

    b. In Review

        i.

        ii.   Unable to locate Jira server for this macro. It may be due to Application Link configuration.

    c. Status of

        i.   ?

        ii.   Unable to locate Jira server for this macro. It may be due to Application Link configuration.   ?

    d. Plans for

2. All API Alignment Issues

type	key	summary	assignee	reporter	priority	status	resolution	created	updated	due

Unable to locate Jira server for this macro. It may be due to Application Link configuration.

3. Tomcat (and Jetty) Support in 5.x

Ticket Summaries

1. Please squash a bug!

key	summary	type	created	updated	due	assignee	reporter	priority	status	resolution

2. Tickets resolved this week:

key	summary	type	created	updated	due	assignee	reporter	priority	status	resolution

3. Tickets created this week:

key	summary	type	created	updated	due	assignee	reporter	priority	status	resolution

Minutes

- 5.0.0 sprint preparation tasks https://wiki.duraspace.org/display/FF/Fedora+5.0.0+Preparation+Tasks
    - All known alignment issues should be in Jira tickets and noted in the delta document https://wiki.duraspace.org/display/FEDORAAPI/Fedora+API+Spec+and+Delta+Document+Verificationprior to the start of the next sprint (September 10)
    - Documentation needs attention – e.g. guidance for modelling content in production (LDP, PCDM)
    - Compatibility Test Suite (CTS) needs to get fully stubbed out – great place to reach out to potential developers, as this is low barrier to entry and work can be done in a small granular way
    - Question: Should Camel Toolbox be made more lightweight, Java Client be built out, or some of both?
- Issues on the API Alignment backlog
    - Several issues currently in progress or needing review https://jira.duraspace.org/browse/FCREPO-2827?jql=filter%3D14308%20AND%20(status%3D%22In%20Progress%22%20or%20status%3D%22In%20Review%22)
    - FCREPO-2771may inform implementation of FCREPO-2742– questions of how to return specialty nodes
    - FCREPO-2798may need some spring configuration to make the security manager available in the context
- Tomcat/Jetty support in Fedora 5
    - We'll support Tomcat that supports the version of Java we're releasing on – this will depend on the results of testing.
    - Jetty is not released as often – 9.x is pretty old, and we will support it.
    - It would be good to confirm with any testers the version number of the web-server they are using.
    - It would be good to build testing against versions into the CI.

Actions

- Danny to explore inserting a macro into documentation for Fedora version.
- Send email to community seeing who is interested in reviving OAI
