## Notes

[Draft notes in Google-Doc](#)

### Mailing list queries

1. FreeMarker template error
  - a. Question about the jar files. (Cricket, literally.) Error appears in 1.9.2 and 1.10.
  - b. Have they made any ontology changes? Do they have class groups defined? Is there an issue with the TBox or display rdf getting loaded?
  - c. Huda generously offers to write an email, because she's been known to do this in the past.

### Community updates

1. Product Evolution:
  - a. Demo on React static js, not with Gatsby.
    - i. Creates static pages, but can have dynamic assets. (Jim at Duke did the demo.)
  - b. Looking into what the next step should be – need to look into the "middleware," so that GraphQL could be used (Alex).
  - c. PE calls are moving to Wednesdays.
  - d. People at Elastic are looking at how they can possibly leverage GraphQL.
  - e. Slight digression on Elastic and the sprint and "rich JSON documents."
  - f. Need to define what fields would be in those JSON documents (Huda).
  - g. Now a digression on Blacklight....
  - h. Andrew: any way of linking the PE work with the September sprint?
2. I18n: Clear tasks have been identified to be done during the September sprint.

### Documenting ingest approaches

1. CU Boulder: VIVO-Harvester (direct to Jena)
2. Kitio: VIVO pump
3. Cornell: Home grown, over Sparql update
4. Brian: mostly home grown, one-off customizations, also over Sparql update (as a general rule)

### Sept sprint planning

1. Encouraging people to sign up.

### Previous Actions

- [Don Elsborg](#) to document "firsttime" resolution in CU Boulder wiki, circulate this doc to email list and discuss as a team how to integrate this in VIVO documentation
  - moved initialTBoxAnnotations.n3 back to firsttime. Need to edit this to change a few labels. eg authors "CU Boulder Authors"
    - eg: <https://github.com/cu-boulder/vivo-cuboulder/blob/a3b7e70704264b2c4fead29ef80c5efc45a9357e/home/src/main/resources/rdf/tbox/firsttime/initialTBoxAnnotations.n3>
  - Had some changes in propertygroups.rdf, in 1.7 this was moved to firsttime. Left it there now
