DSpace Release 5.10 Status

Version 5.10

Support for DSpace 5 ended on January 1, 2023. See Support for DSpace 5 and 6 is ending in 2023
DSpace 5.10 Release Notes

Release Notes#5.10ReleaseNotes
We recommend sites dependent on Java 7, REST API and/or RDF skip DSpace 5.9 and update to DSpace 5.10

Unfortunately, bug fixes in the DSpace 5.9 release resulted in issues running DSpace 5.9 on Java 7, and with running the REST API and RDF interfaces. These issues are being resolved in an upcoming 5.10 release (see below for more details). Sites which are dependent on one of these features should consider upgrading directly from DSpace 5.8 to 5.10.

Summary

DSpace 5.10 is a bug fix release to resolve JAR dependency issues found in DSpace 5.9 for users running Java 7 (regardless of Tomcat version).

This release also addresses a bug in the DSpace 5.9 release that prevented VIEW statistics from being logged by DSpace.

Other minor bug fixes have been included in the release.

Major bug fixes include

-
-

> Unable to locate Jira server for this macro. It may be due to Application Link configuration.

Other fixes include

-

> Unable to locate Jira server for this macro. It may be due to Application Link configuration.

  - If you don't reindex, newly added bitstreams would no longer display the file metadata in their index. (But, old bitstreams would still continue to display file metadata until you do a full reindex).
  - Institutions unaffected/unconcerned by this bug do not need to reindex. If you do choose to reindex, then the bug would be fully fixed

In addition, this release fixes a variety of minor bugs in the 5.x releases. For more information, see the Changes section below.

Upgrade Instructions

- For upgrade instructions from ANY PRIOR VERSION to 5.10, please see Upgrading DSpace
- When upgrading from any 5.x version, if you're reusing your 5.x configuration, make sure to change all instances of Filter attribute "red" to "ref" (e. g. <Filter red="exampleFilter" /> to <Filter ref="exampleFilter" />) in [dspace]/config/crosswalks/oai/xoai.xml. "red" was a temporary workaround for a bug (xoai issue #32), which was first fixed in DSpace 5.4.

No new features in DSpace 5.10

5.10 is a bug-fix release. This means it includes **no new features** and only includes the above listed fixes.

For a list of all new 5.x Features, please visit the 5.x Release Notes.

Changes

The following bug fixes were released in 5.10.

key	summary	type	created	updated	due	assignee	reporter	priority	status	resolution

> Unable to locate Jira server for this macro. It may be due to Application Link configuration.

Organizational Details

Release Coordination

- Release Coordinator: Terrence W Brady

Contributors

The following individuals provided code or bug fixes to the 5.10 release: Terrence W Brady , Alexander Sulfrian , Philip Vissenaekens (Atmire) , Jozsef Marton.
