

2018-10-02 - VIVO Development IG

Date

02 Oct 2018

Call-in Information

Time: 11:00 am, Eastern Time (New York, GMT-04:00)

To join the online meeting:

- Go to: <https://duraspace.zoom.us/j/823948749>
- Or iPhone one-tap :
 - US: +14086380968,,823948749# or +16468769923,,823948749#
- Or Telephone:
 - Dial(for higher quality, dial a number based on your current location):
 - US: +1 408 638 0968 or +1 646 876 9923 or +1 669 900 6833
 - Meeting ID: 823 948 749
- International numbers available: https://duraspace.zoom.us/join?m=Qy8de-kt6W4fMMDQCAV_3qfH1W-lxAo5

Slack

- <https://vivo-project.slack.com>
 - Self-register at: <https://goo.gl/forms/JxQFkut4TYj4Ehww1>

Development Process

- See <https://github.com/vivo-project/VIVO/wiki/Development-Processes>

Attendees

[blocked URL](#) Indicating note-taker

1.

[Andrew Woods](#)

2. [Jim Blake](#)

3. [Tim Worrall](#)

4. [Huda Khan](#)

5. [Don Elsborg](#) ★

6. [Brian Lowe](#)

7. [Ralph O'Flinn](#)

8. [Kristina Cottingham](#)

9. [Joel Richard](#)

10. [Steven McCauley](#)

11. [@Svantje Lilienthal](#)

12. [Benjamin Gross](#)

Agenda

1. [Sprint update](#)
 - a. i18n
 - b. Externalized Search
 - c. ABox / TBox
2. 1.10
 - a. bugs (1.10.1?)

type	key	summary	assignee	reporter	priority	status	resolution	created	updated	due
------	-----	---------	----------	----------	----------	--------	------------	---------	---------	-----

Unable to locate Jira server for this macro. It may be due to Application Link configuration.

- b. Plans for a 1.10.1 patch release
- 3. Advance
 - a. Unable to locate Jira server for this macro. It may be due to Application Link configuration.
- 4. ORCID in
- 5. Recent mailing list topics.
 - a. [No Subject](#) - csv ingest
 - b. [Add Handle Support in VIVO?](#)
 - c. [Adding External Vocabularies](#)
 - d. Answered. Nice work, team!
 - i. [Accounts creation via Sparql Update API](#) - thanks [Jim Blake](#)
 - ii. [How to add corresponding name to a language tag?](#) - thanks [Benjamin Gross](#)
 - iii. [VIVO COMMITTEE ENTITY](#) - thanks [Marijane White](#)

Notes

Draft notes in [Google-Doc](#)

- Pre-Agenda discussion regarding ORCID
 - Suggestion to log into OpenVIVO and provide ORCID and see what happens
- Sprint update
 - German updates for intl, externalized search included jims updates, Ralph and Huda did review of some SOLR items
 - Ralph - one minor update and it should be done
 - Huda - needs another smoke test, search boost then done
 - SOLR -- just needs a little clean up
 - Andrew - 1.10.1 can be a minor update with these changes
 - Don - did elastic index people?
 - Andrew -- content showed up in elastic, but when he added people they did not
 - Don -- had no problem seeing people show in 1.9.3 with elastic
 - Don - to create a ticket to update docs with centos 7, glib 2.14 pre-req to compile 1.10
 - Ralph -- Java 8 EOL -- need to look at this
 - Jim -- Java 11 has long term support, Oracle will prob charge for 1.11 support, openjdk should be considered
 - Ralph - only thinking openjdk
 - Jim -- is doc up to speed with openjdk vs. oracle jdk
 - Ralph -- will update docs
 - Brian -- problems uploading jpegs
 - Don - changes in application.n3 to allow uploads of images with openjdk 8
 - Benjamin posted: <https://github.com/vivo-project/Vitro/commit/437bb9f5153c240ca90a34b8b69460f990c045e2> for Grahams openjdk image changes
 - Andrew - re java version and openjdk - we need a policy regarding version of java and os that vivo works against
 - OpenJDK
 - <https://access.redhat.com/articles/1299013>
 - <https://adoptopenjdk.net/support.html>
 - <https://openjdk.java.net/> (edited) -- this is actually Oracles
 - So which version of jdk to attach ourselves to
 - Ralph - has always used the Redhat versions and had success
 - Andrew - Redhat version is most reliable and supported by RHEL
 - Ralph - Redhat version also has a high level of support for Tomcat
 - Jim posted in slack: Some discussion on our options: <https://blog.joda.org/2018/09/do-not-fall-into-oracles-java-11-trap.html>
 - Jim -- one of the things in the article is the growth of support for various implementations.
 - Andrew - ultimately doing review of dependencies
 - Ralph - because we're so far behind solr versions he had to go way back in archives to figure out why he had UI issues
 - Question to all: is there anyone who gets a kick out of updating maven/project dependencies? Maven has good tools to scan dependencies.
 - Ralph could be into this
 - Jim -- if Ralph finds code changes to accommodate updates, he's interested in this
 - Andrew - Kitio was stuck with creating a pull request that was too big to land, he'll probably recreate these into smaller requests
 - Abox/Tbox
 - Brian - we have a coherent chunk of stuff, should
 - Don -- add use cases to docs
 - Andrew -- add use cases to tickets, one ticket per ticket.
 - Don -- action - add tickets for label change, class group change, visibility, classgroups assignments, the latest email for authentication
 - Regarding adding accounts -- the thread from email 5.d.i can be added to the doc, because the thread talks about config vs. content graphs
 - Jim -- re: authentication issue, the issue might be solved with some extra research and not code
 - Andrew - action to find where to place documentation in wiki
- Item 2.a VIVO 1.10 bugs
 - Jira 1547 -- ready to go, needs some review
 - If 1547 gets merged 1602, 1549 can be reviewed

- Proposing 1.10.1 to distribute these changes
 - Ralph -- let's just wait for 1.11
 - Don - who is running 1.10
 - Andrew - doesn't know
 - Ralph - guessing that shops are probably just testing
 - Benjamin - at least 3 shops running 1.10
 - UNAVCO, Clarivate demo, and Fred Hutch are all on 1.10
 - Benjamin - nothing that's super urgent for patch release
 - Andrew - ok - will wait for 1.11
- Advance Role demo done by Graham
 - Large piece of work, will need multiple eyes for a review
 - Andrew proposing a role mgmt swarm to review this
 - Silence for volunteers --- crickets
 - Benjamin -- likes what Graham has done, but can't commit time
 - Ralph - in the same boat, but no time, what time he has would rather work on dependencies issue
 - Andrew asking Svantje, who is working with Graham, if she's into working on this?
 - Kristina Cottingham : Integration for their vivo is the priority. They want to enable what they can regarding the ORCID API.
 - Andrew will try to move it forward best he can
- Agenda 4 - ORCID integration
 - Pointer to commit that went into OPENVIVO is a starter
 - Kristina - tried to log into OPENVIVO with ORCID and got a 500 error
 - Andrew -- the OPENVIVO server just needs a reboot
- Re: mailing list - some unresolved issues
 - 5a - brief, not much to work with, person trying to ingest and just needs guidance
 - Sept 10th, same person had problems starting 1.9, lots of response on that thread
 - 5b - Yinlin put this forward
 - To what degree do we want to build in VIVO support for Handles
 - Brian - can talk to ontology group about handles
 - Don - spoke with folks and they stated that a handle maybe shouldn't be a first class object in VIVO. Perhaps it should just be a pointer to a remote handle server?

Actions

- [Don Elsborg](#) - Create ticket to update 1.10 requirements to show glibc 2.14 dependencies and centos 6 incompatibility
- [Don Elsborg](#) - add jira tickets for abox/tbox use cases - one ticket for each use case
- [Andrew Woods](#) - find out from Mike where the [abox/tbox documentation should be in the wiki](#)
- [Brian Lowe](#) - check with ontology group on handles

Previous Actions

- [Alex Viggio](#) will bring news of Elasticsearch instead of Solr up with Product Evolution. Might there be consequences for the September sprint.
