Minutes

5.0 Release

- Tickets
 - Several tickets in review
 - Unable to locate Jira server for this macro. It may be due to Application Link configuration. - still an outstanding issue,
 - Unable to locate Jira server for this macro. It may be due to Application Link configuration. - Ben Pennell assigned, to be
 - not critical to the release
 - Unable to locate Jira server for this macro. It may be due to Application Link configuration. - ready to go, just needs
 - Unable to locate Jira server for this macro. It may be due to Application Link configuration. - needs review
 - response is recorded, the CTS should skip the test - e is unsupported, and such a
- How do we feel about the release candidate?
 - Andrew: we should take a day to do some sanity testing before release ([candidate release testing page](#))
 - Not doing a vagrant box for the RC
 - UMD plan to do camel toolbox and 5.0 release testing and report any issues
 - Java client: Decoupled from Camel toolbox but still useful for other purposes. Not a requirement for the release candidate
 - Goal: release 5.0 by end of next week
 - Do we have a release manager? Danny is willing.
 - What is our goal for the RC? Community/ModeShape implementation plus the CTS.
 - Alternate implementations are related for the release of the specification but not a requirement for the 5.0 release
 - We should publish the HTML report of the CTS for 5.0, along with any from alternate implementations
 - CTS doesn't currently report on the version of the software it is run against. It would be good to make this an optional user-provided parameter
