### Pre-agenda

- WikiCite 2018 - Don Elsborg and John Mark Ockerbloom attending
- Per Mike Conlon -- wikidata has no concept of an "authoritative source"
- Dec dev call -- Danial Mecham (sp?) from wiki is attending the VIVO dev call
  - [https://meta.wikimedia.org/wiki/User:Daniel\\_Mietchen](https://meta.wikimedia.org/wiki/User:Daniel_Mietchen)
- JDK -- per Ralph -- past Jan 2019 - jdk8 no longer supported by Oracle. Next option is JDK 11, since 9 and 10 are not options. Oracle will take over openjdk project and update patches?? ( not sure I heard this right ). So for VIVO we need to dev a policy as to what JDK we support - eg jdk 11 long term. Don - is oracle supporting openjdk Ralph - in a sense yes. Oracle jdk 11 and openjdk 11 should work identically except for a couple of minor differences. For 6 months on each release they'll support patches for both. After that it becomes a leadership thing for openjdk as to how to provide continuing support, for things like security. It does look like Redhat took the lead. Andrew - based on changes Oracle is introducing we should release VIVO against a non-Oracle openJdk.

  - Ralph - Open ticket for JDK policy

### Agenda

- All: Think about what to tie up for this year

### Dec Sprint

- Dec Sprint - Short - 1 week
  - 16 people - many not developed in VIVO before

- Focus - Dev Process
- Ideas about future processes?
- PE - ElasticSearch/Solr Plan for Dev Sprint (Don/Ralph)
- Look into Containers - what it might take? (Huda)
  - (Add to Sprint Page)
