Attendees

blocked URL Indicating note-taker

1. Kitio Fofack
2. Ralph O'Flinn
3. Andrew Woods
4. Mike Conlon ⭐
5. Benjamin Gross
6. Brian Lowe
7. Steven McCauley

Agenda

1. Review of agenda
    a. Any pressing issues?
2. December sprint - (Dec 3 - 7)
    a. One week
    b. Focus
        i. Introduction to VIVO development (minor clean-up)
        ii. ElasticSearch? and Solr7?
        iii. i18n?
        iv. Containerization?
            1. A Docker Tutorial for Beginners - https://docker-curriculum.com/
            2. Dockerize your Java Application - https://runnable.com/docker/java/dockerize-your-java-application
3. Mailing list questions
    a. fresh 1.10 release install crashing with [OWLRDFConsumer] error
    b. how to modify and deploy vitro?
4. Housekeeping updates from last week
    a. Moving the Advanced Role Management feature forward
        i. Unable to locate Jira server for this macro. It may be due to Application Link configuration.
        ii.
            1. https://github.com/vivo-project/Vitro/pull/94

2. https://github.com/vivo-project/VIVO/pull/95

b. Vagrant
   i. Updating to 1.10 (issue 41) - Don Elsborg?

c. Triple Pa
   i. Unable to locate Jira server for this macro. It may be due to Application Link configuration. - Resolve "open"
   ii.
   iii. Unable to locate Jira server for this macro. It may be due to Application Link configuration.

d. Themes
   i. Unable to locate Jira server for this macro. It may be due to Application Link configuration. - Thanks,Kitio
   ii. Unable to locate Jira server for this macro. It may be due to Application Link configuration. - may be

e. Misc
   i. Unable to locate Jira server for this macro. It may be due to Application Link configuration. - Don Elsborg(invest
   ii. Unable to locate Jira server for this macro. It may be due to Application Link configuration. - Mike Conlon to
   iii. Unable to locate Jira server for this macro. It may be due to Application Link configuration. - Guidance on
   iv. Unable to locate Jira server for this macro. It may be due to Application Link configuration. - Can anyone
   v. Unable to locate Jira server for this macro. It may be due to Application Link configuration. - Suitable for
   vi. Unable to locate Jira server for this macro. It may be due to Application Link configuration. - Needs more

5. In-Review

type	key	summary	assignee	reporter	priority	status	resolution	created	updated	due

Unable to locate Jira server for this macro. It may be due to Application Link configuration.

6. 1.10
   a. bugs (1.10.1?)

type	key	summary	assignee	reporter	priority	status	resolution	created	updated	due

Unable to locate Jira server for this macro. It may be due to Application Link configuration.

Notes

Draft notes in Google-Doc

- Ralph is adding some dockerization links
- Sprint next week (one week). Large number of folks. Many new. Ramp up on VIVO development. Cherry pick some small tickets. Open some small tickets. Ontology likely to have a ticket or two. Many new Internationalization tickets. Work on containerization. Upgrade the vagrant. Test frameworks. Meeting Monday at 11. See https://wiki.duraspace.org/display/VIVO/2018-12+Sprint Add some tags regarding the kind of techology background that might be helpful. This idea might be useful on tickets generally.
- Mailing list
  - "fresh 1.10 release install crashing with [OWLRDFConsumer] error" We can ask how the precisely software was installed -- an artifact, or from source. Andrew will respond
  - how to modify and deploy vitro? Source and class might be out of synch with the IDE? Or perhaps moving the war file is not the way to install VIVO. The deploy process needs to do everything that the local process is doing. [Perhaps this could be fixed] Kitio will respond.
- Advanced Role management

    - Many comments, many addressed in commits
    - A separate branch
    - Need reviews (for sprint)
- Vagrant improvement (might also be done in sprint)
- TPF discussion
    - Needs to respect the publication flags
    - Needs to be configurable (on/off) in runtime.properties (on by default)
    - Mike will create tickets
    - 1615 needs verification (TPF does not work with TDB)
- Need a review of 1543
- Need a review 1649

Actions

- Andrew Woods to respond to mailing list: "fresh 1.10 release install crashing with..."
- Kitio Fofack to respond to mailing list: "how to modify and deploy vitro"
- Mike Conlon to create ticket: TPF should be toggle-able, on by default
- Mike Conlon to create tick
- Mike Conlon to address: Unable to locate Jira server for this macro. It may be due to Application Link configuration.

Previous Actions

- Don Elsborg to upda
- Kitio Fofack to work Unable to locate Jira server for this macro. It may be due to Application Link configuration.
- Unabl e to locate Jira server
- Unable to locate Jira server for this macro. It may be due to Application Link configuration.
- Don Elsborg - add jira tickets for abox/tbox use cases - one ticket for each use case
- Brian Lowe - check with ontology group on handles
- Alex Viggio will bring news of Elasticsearch instead of Solr up with Product Evolution.
- Benjamin Gross to create new Jira issue for additional errors thrown startup.
