Release Notes and Downloads

Here are the release notes for the most recent version of Islandora, as well as links to the appropriate Github repositories. Islandora is released twice a year. Rather than waiting for the release, some institutions prefer to run closer to the most recent code (known as HEAD or the 7.x branch), where bugs might be fixed or new features added. If you encounter a bug in the release (there are always known issues), it's a good idea to review the Github repository for that module to see if a fix has been submitted. Islandora runs a continuous integration testing framework, which means that new code for Islandora is always tested before being merged.

Please, do not mix and match different versions of modules.

Release Notes

Some quick notes on deprecations, new versions and fixes:

- Islandora Internet Archive Bookreader is currently using IA BookReader v1.x, which will be deprecated upon release in favor of IA BookReader v2.x for the Islandora 7.x-1.13 release.
- Islandora OAI now supports Qualified Dublin Core (QDC) as an output format.
- Islandora Scholar now uses v2.x of the Citeproc utility.
- Islandora Compound Solution Pack may now use Solr to aggregate compound objects as opposed to the triplestore.
- Islandora XACML Editor now has Drush scripts for applying XACML policies to objects and their children.
- Islandora Scholar Embargo now respect namespace restrictions.
