 - Possible OR2019 Workshops
 - **DSpace 7 Upgrading / Configuring / Customizing workshop (Tim, Art & Andrea)** (for Users – Repo Mgrs and Developers). (Presenters: *Tim Donohue, Art Lowel, Andrea Bollini*)
 - This will be two 1/2 day workshops:
 - First 1/2 day will concentrate on DSpace 7 from a "technician" perspective. How to install /upgrade / configure DSpace 7. How to do minor customizations like header/footer/theme changes.
 - Second 1/2 day will concentrate on DSpace 7 advanced customization (for developers). How to enhance the UI via Angular. How to use the REST API, etc.
 - **DSpace + Docker Workshop (Terry & Pascal)**. How to demo/play/develop with DSpace in Docker (both DSpace 6 and 7). (Presenters: *Terry Brady & Pascal Becker*)

 - a DSpace-CRIS 7 talk is expected as continuation of the Configurable Entities talk

 - <https://github.com/DSpace/dspace-angular/pull/342> (Item Actions - NEED Demo REST API Update)
 - <https://github.com/DSpace/dspace-angular/pull/335> (BLOCKED by REST Contract discussions about Move Item)
 - <https://github.com/DSpace/dspace-angular/pull/329> (Merge conflicts need fixing)
 - Submission/Workflow PR: <https://github.com/DSpace/dspace-angular/pull/279>
 - Giuseppe says this will be ready for final review by Monday, January 14. He will ping us
 - **ACTION:** Anyone who has added past comments (that are now fixed), please go in and *resolve your past comments* once you've verified the fix. That'll help us figure out what is outstanding (if anything)
- REST Team Updates
 - Open PRs: <https://github.com/DSpace/DSpace/pulls?q=is%3Apr+is%3Aopen+label%3A%22REST+API+v7%22+sort%3Aupdated-desc>
 - Merged PRs:
 - In Progress tickets / PRs:
 - Tickets / PRs requiring review:
 - **REST Contract tickets blocking other work (High Priority to get unblocked)**
 - Request to use Spring Data REST "text-uri/list" to manage links between objects (Resources: <https://docs.spring.io/spring-data/rest/docs/current/reference/html/#repository-resources.association-resource> and <https://www.baeldung.com/spring-data-rest-relationships>)
 - <https://github.com/DSpace/Rest7Contract/pull/34>
 - <https://github.com/DSpace/Rest7Contract/pull/35>
 - <https://github.com/DSpace/Rest7Contract/pull/41>
 - **ACTION:** Tim Donohue will reach out to Andrea Bollini (4Science) to understand whether we can move forward with parameters for now, and update this contract/implementation later. It's unclear to the team why these three tickets are blocked for Spring Data REST alignment, while others that involve links/associations (e.g. [PR#37](#) (Item CRUD) and [PR#38](#) (Metadata Registry)) were approved.
 - Should we consider fixing all these implementations to better align with Spring Data REST recommendations (perhaps in a future Ticket/PR)?
 - **ACTION:** We need to better document the requirements / best practices for our REST API. Currently alignment with Spring Data REST is not mentioned in our REST Contract README: <https://github.com/DSpace/Rest7Contract/blob/master/README.md>
 - Updating Collection/Community contracts (**Requires re-review**)
 - Feedback from Andrea, but needs re-review
