2019-01-22 DuraCloud Contributor Call

Call Details

- Time: 11:00am Eastern Time (find your time here)
- Join Zoom meeting: https://duraspace.zoom.us/j/814345256
    - Or iPhone one-tap : US: +16468769923,,814345256# or +16699006833,,814345256#
    - Or Telephone: US: +1 646 876 9923 or +1 669 900 6833 or +1 408 638 0968 (Meeting ID: 814 345 256)
    - International numbers available: https://zoom.us/u/YQRCN
- blocked URL - Indicates who will be taking minutes

Attendees

- Bill Branan
- Heather Greer Klein ⭐
- Nicholas Woodward
- Courtney C. Mumma

Agenda

(If you have an agenda suggestion/addition, please leave a comment!)

1. DuraCloud 5.1.0 release review
2. Priority development work (see backlog)
    a. Priority issues list

Resources

DuraCloud documentation

1. User documentation (wiki)
2. Deployment documentation (github)

Minutes

Review of 5.1: Danny got the release out, chance to share notes and questions. First release with this contributors group! Upgrades done on TDL side.

Priority list for next release:

1. Priority Issues list
    a. Removal of DPN references
    b. Anything that has come up in the last month or two?
        i. COPPUL group in Canada would like to know about update to the AWS client builder. No ticket yet, but should be a priority to update.
        ii. Roadblock on #1207, Danny put a lot of work into it but not sure how to move forward. Moderate severity, hard to prioritize. Danny: we should do it when we have to, since we don't use spring data REST.
        iii. SyncTool: gathering uses cases from different types of use: command line, single pass, continuous pass, etc. Within this group could start a list of the use cases we are aware of, some user stories, and go out to users to validate the user stories. Will keep on the list.
        iv. Will leave the list as-is unless we find and create new ones and add to the list as they come up.

Next sprint and timing?

- Danny: same time as last year unless things don't need to be addressed immediately
- Could do bug fixes, address more urgent problems
- Multipart transfer would be a high value feature but a lot of work involved, to make feature possible and to re-ingest the existing chunked files
- Three in-progress tickets that involve Andrea\
- 6-8 weeks in Feb/Mar where Nick could do some development work, based on our priority. Nick will let the group know about availability.

Actions

- Determine tickets that are small enough to accomplish is a short period of time: 1192
- Bill Branan will check with Andrea about in-progress tickets
-
