

# 2019-03-31 VIVO Updates

**VIVO Presentations at CNI** The Coalition for Networked Information (<http://www.cni.org>) is having its spring member meeting in St. Louis Missouri, April 9-10. There are two VIVO "project briefings" on the agenda. We hope you are able to attend these briefings:

1. **Scholarly Output Projects**

Martin R. Kalfatovic, Smithsonian Institution  
Paul Albert, Weill Cornell Medicine  
Terrie Wheeler, Weill Cornell Medicine

2. **Research Intelligence, Repurposed Data, and Reputation: The Evolution of VIVO Implementations at Duke and Texas A&M Universities**

Bruce E. Herbert, Texas A&M University  
Julia K. Trimmer, Duke University

**Jim Blake retirement** **Jim Blake** of Cornell University in Ithaca New York retired this past week. Jim started with the VIVO Project in 2010 during the NIH grant era. Jim served as the technical lead for the VIVO project from 2013-2016. Jim was always one of the most knowledgeable, thoughtful, and productive contributors in the VIVO community. We wish Jim the very best for his retirement. Bravo Jim!

**VIVO Breakouts at the Duraspace Summit** At the Duraspace Summit coming up April 10 in St. Louis, Missouri, VIVO will have two break out sessions. If you are attending the summit, please plan to attend these sessions. The sessions are:

1. Status of 2019 product direction efforts
2. VIVO Project and Lyrasis: opportunities and objectives

We hope to see you there. All members are invited. Not a member? See [Become a Member](#). Are you a member and you did not get an invitation? Please contact [Kristi Searle](#) at Duraspace.

We hope to have dial-in capability for these sessions. Details will be posted to the VIVO email lists. We hope you can join!

**Architectural presentation** In January, VIVO hosted an "architectural fly-in" bringing people together to think through future initiatives and the software architectures that might be required to support them. [Huda Khan](#) of Cornell summarized the discussions in a presentation [available here](#). There are several major initiatives going on that require active coordination. [Andrew Woods](#) facilitates the [Development Interest Group](#) that meets every Tuesday. This group works to make sure things fit together now and in the future. All developers are welcome!

**VIVO presentation at EuroCRIS** [Anna Guillaumet](#) of SIGMA, a Duraspace member supporting the VIVO Project, will be presenting at the upcoming EuroCRIS meetings in Helsinki, Finland. Anna is a member of the VIVO Project Leadership Group and will be presenting on their experience with VIVO in support of multiple universities in Spain.

Go VIVO!

Mike
