Delayed

1. (REST Contract) Edit Homepage News: <https://github.com/DSpace/Rest7Contract/pull/45>
 - a. Delayed until after Preview release. General agreement (in meeting on March 21, 2019) that storing HTML in metadata fields is not really ideal behavior. Metadata (from a librarian standpoint) tends to be free of format-related markup (as that allows for easier sharing, understanding of metadata. Currently Community & Collection homepage information is HTML-based and is **stored in metadata** that is appropriate for a minor subset of information (like the title) but it is better to move large/rich text to bitstreams.
 - b. Proposal here is to consider storing HTML-based markup (for Site, Community & Collection homepages) in Bitstream(s) associated with the object in question. May allow for more CMS-lite behavior in the future
 - c. Timeline for this is uncertain. Possibly in 7 or 8. May depend on how/whether it can be scoped.
2. (REST) Scripts & Processes endpoint: <https://github.com/DSpace/Rest7Contract/pull/17>
3. Concurrency in DSpace 7 (or 8). What do we want to do when multiple editors are editing the same object? Needs further analysis regarding implementation details
 - a. We've decided (in meeting on March 7, 2019) to use ETags to implement concurrency. REST Contract notes on ETags: <https://github.com/DSpace/Rest7Contract#etags--conditional-headers>
 - b. ETags only update of the two fields match. If someone edits first, your edit would fail and you would get a fail response (422?)
 - c. ETags seems to have broader support in other REST APIs. Recommended also by both Art and Andrea.

Priorities for Preview Release

As discussed in previous DSpace 7 meetings, our DSpace 7 Preview release is aimed for end of April, followed by a Preview #2 in May (before OR2019). The top priorities for the Preview Release are (in this order):

1. Submission & Workflow UI / backend
2. Configurable Entities (from [DSpace 7 Entities Working Group \(2018-19\)](#))
3. [Upgrading Solr Server for DSpace](#) (not required for Preview, as there's no user facing features. However, the earlier we feel comfortable merging this effort the better)

Notes

- Tim is out next Mon-Weds (April 29-May 1) but will be checking email occasionally. Will return in time for next week's meeting on May 2
- Preview 1 Release
 - We are a little behind, but not by much. Seems hard to make "end of April" (especially with Tim traveling). But, we could make very early May.
 - We need **ideally by end of April**
 - A second reviewer on the Configurable Entities REST API PR (Tim already reached out on #dev and #entities-wg channels)
 - A final review of Configurable Entities Angular UI from [Giuseppe Digilio \(4Science\)](#) (Andrea said he should be able to do it by early next week)
 - A final review of MyDSpace Angular UI PR from [Art Lowel \(Atmire\)](#) and/or [Paulo Graça](#) (as this PR has had updates from Giuseppe)
 - Next week we can then work to package up the "Preview" release (with the Preview theme)
- OR2019 Planning
 - A second preview release by OR2019, featuring
 - One Webapp PR (from Tim)
 - Ideally, Solr upgrade process (from Mark W)
 - Theming/branding strategy (Art is working on ideas to bring forward)
 - Possible updates to Entities TBD by [DSpace 7 Entities Working Group \(2018-19\)](#)
- Tim will restart [DSpace 7 Entities Working Group \(2018-19\)](#) in early May. See that wiki page or #entities-wg for more info
- Beta estimation Planning
 - Will be using an estimation process used by other DuraSpace projects/services (called [Wideband Delphi estimation technique](#)) Involves estimates from multiple developers, and pads those estimates with a level of certainty/uncertainty around each feature
 - likely will break down the estimation by UI vs REST API. May have additional categories as well.
 - Tim & Heather need [Art Lowel \(Atmire\)](#) and [Andrea Bollini \(4Science\)](#) to update/check the Development planning spreadsheet (see agenda above) by May 2 meeting. Need to finalize which features are not likely to be done by OR2019, so we can schedule them for estimation process.
