Notes

Docker

1. Ralph using Docker in externalized Solr
2. Brian to use Mac for Docker
3. Huda making progress
4. Benjamin has yet to try

Cineca

1. Interest in seeing the code

2. Sounded like a good pattern
3. JSON configuration approach helpful when it fits
   - This may not always work with complex facets
   - One consistent way of defining search-indexing is important
   - Will need to pay attention to this in the code review
4. The features are appealing
   - Potential opportunity for UI clean-up
   - Would be interesting to evaluate against all approaches to UI features
5. Which implementation of a feature makes it into the core?
   - First pull-request?
   - Call to the community for a feature?
     - i.e. Duke has facets

Tickets

1. Asking for reviews
   - vivo-1692 - Benjamin
   - vivo-1415 - Andrew
   - vivo-1670 - Andrew

Acceptance tests

1. Need to establish a lightweight version
2. Suggestion: group tests together that do not require completely clean environment

VIVO-1691

1. Ideally, we could have ability to include modular UI components
2. Question around advantages of UI over original configuration capability
