 - a. [Priority issues list](#)

Resources

DuraCloud documentation

1. [User documentation \(wiki\)](#)
2. [Deployment documentation \(github\)](#)

Minutes

- Updates
 - DuraSpace team: focused on the the merger, so not much DuraCloud activity
 - TDL: The TCDL conference was last week
 - A few more folks interested in the replication task suite. It's broken in version 6.3, hoping this gets resolved in 6.4
 - A lot of folks wanting to push data from DSpace to DuraCloud
 - DPN data: UT and Texas A&M will just re-ingest with Chronopolis
 - UT Rio Grange - Planning to re-ingest
 - Trinity Univ - Have 3 snapshots (not even 100 GB), but haven't indicated what they will be doing
 - TCDL: Will be moving forward with DPLA
 - Finalized developer roadmap: BPress to DSpace, DSpace 7 review
 - Nick just needs time to get back to DuraCloud dev work
 - SCUFUG (Fedora User Group): Texas A&M, UT, Houston
 - Working to migrate content from Fedora 3.8 to 4
 - OCFL discussed at length, this just makes sense
 - Some questions about Fedora 5 migration tooling
- Development work
 - Nick has a list of work to do
 - Application Link configuration.

une, may look at

Unable to locate Jira server for this macro. It may be due to
- UT Rio G language support. Certain files have non-ASCII characters.
 - this should be fine as long as content is sent in UTF-8 (which is handled by the SyncTool)

Actions

- [Bill Branam](#) will check with Andrea about in-progress tickets
