Notes

1. Islandora 8 release!
2. Fedora 6 Doodle seems to point towards sprint dates in early September and early November
   a. Sept 16-27
   b. Nov 4 - 15
3. Import/Export delta backups. Discussion about whether import-export is the correct place for this as the items on disk would have to be checked to remove items from disk if they were deleted from the repository. Perhaps this should be a separate tool that runs against a repository and an export and updates it. Danny Bernstein will check with Seth Shaw to see what he thinks of this proposal.
4. Fedora 5.1.0 will wait for FCREPO-3006 and then RC-2 will be cut.
5. Tabled Fedora 6 until participants at Open Repositories return.

Actions

- Peter Eichman is planning to work on documenting UMD's fixity check system on the Fedora in Production: Case Studies wiki page.
- Jared Whiklo to fix Java 11 javadoc errors in a new ticket, link to fcrepo-2958
