

2019-06-18 - VIVO Development IG

Date

18 Jun 2019

Call-in Information

Time: 11:00 am, Eastern Daylight Time (New York, GMT-04:00)

To join the online meeting:

- Go to: <https://duraspace.zoom.us/j/823948749>
- Or iPhone one-tap :
 - US: +14086380968,,823948749# or +16468769923,,823948749#
- Or Telephone:
 - Dial(for higher quality, dial a number based on your current location):
 - US: +1 408 638 0968 or +1 646 876 9923 or +1 669 900 6833
 - Meeting ID: 823 948 749
- International numbers available: https://duraspace.zoom.us/join?m=Qy8de-kt6W4fMMDQCAV_3qfH1W-lxAo5

Slack

 - Self-register at: <http://bit.ly/vivo-slack>

Attendees

[blocked URL](#) Indicating note-taker

1. [Brian Lowe](#)
2. [Ralph O'Flinn](#)
3. [Andrew Woods](#)
4. [Mike Conlon](#)
5. [Steven McCauley](#)
6. [Huda Khan](#) ★

Agenda

1. What are folks working on? What are the local priorities?
2. [Sprint update](#) (June 17th - 28th)
 - a. External Search
 - i. Merge 'sprint-search' ([vivo](#), [vitro](#)) into 'develop'?
 1. Ralph is refreshing "devsprint" today that will bring in develop, sprint search, and tickets.
 - b. Enable connection of decoupled, read-only "profiles" user interface to VIVO
 - c. Define "shapes" of VIVO entities
 - d. Dockerize appropriate components
3. TAMU Scholars / VIVO Scholars [Entities](#)
 - a. [Domains related to representing scholarship](#)
 - b. [VIVO classes](#)
 - c. [TAMU data model](#)
 - d. VIVO UI default expectations?
4. New feature: Messaging
 - a. Based on the [IndexingChangeListener](#) pattern
 - b. Potentially with [RDF-Patch](#) bodies
 - c. [Early development](#)
5. Working towards the VIVO 1.11.0 release
 - a. Landing [Design - External Search](#)
 - b. Other tickets we want to include?
 - i. Docker w
 1. Unable to locate Jira server for this macro. It may be due to Application Link configuration. - Don
 2. Unable to locate Jira server for this macro. It may be due to Application Link configuration. - Don
 3. Unable to locate Jira server for this macro. It may be due to Application Link configuration. - Ralph

6. Tickets	c. Release	ii.												
		iii.	Unable to locate Jira server for this macro. It may be due to Application Link configuration.											
		iv.												
	a. Needing	i.												
		ii.												
		iii.	Unable to locate Jira server for this macro. It may be due to Application Link configuration.											
b. type		key	summary	assignee	reporter	priority	status	resolution	created	updated	due

Tickets

1. Status of In-Review tickets

type	key	summary	assignee	reporter	priority	status	resolution	created	updated	due
Unable to locate Jira server for this macro. It may be due to Application Link configuration.										

2. Received

type	key	summary	assignee	reporter	priority	status	resolution	created	updated	due
Unable to locate Jira server for this macro. It may be due to Application Link configuration.										
a.	Unable to locate Jira server for this macro. It may be due to Application Link configuration.									
b.	Unable to locate Jira server for this macro. It may be due to Application Link configuration.									
c.	Unable to locate Jira server for this macro. It may be due to Application Link configuration.									
d.	Unable to locate Jira server for this macro. It may be due to Application Link configuration.									

3. Bugs (1.11)

type	key	summary	assignee	reporter	priority	status	resolution	created	updated	due
------	-----	---------	----------	----------	----------	--------	------------	---------	---------	-----

Unable to locate Jira server for this macro. It may be due to Application Link configuration.

Notes

[Draft notes in Google-Doc](#)

Edit capability

Ralph: Changing the editing front-end? Come over to the dark side and join the React effort. (Even used the word synergy. Ralph comes out swinging hard.)

Mike: Editing challenges: (a) russian doll problem (editing object A requires also editing object B and so on). VIVO approaches this by using custom forms for editing (sometimes) and sometimes having the user navigate all the nested relationships. (b) Certain values should be picked from lists so we don't have 1 million ways of stating a particular department/university. Lookups/controlled vocabularies.

Mike: <https://www.project-freya.eu/en/blogs/blogs/the-pid-graph> -> working on research graph editing problem. (son of Thor. that's right, he went there. Oh wait, Thor was a project.)

1. Current approach VIVO UI takes:
 - a. Take RDF from a page for a given entity
 - b. Currently, looking at class of objects
 - i. what properties are supported by ontology
 - ii. what properties exist
 - iii. are any properties controlled
2. A "shapes" approach
 - a. Karma and The Pump already do a shape->rdf mapping
 - b. These tools have already analyzed the nature of the shapes
 - c. These tools are still more complex than is currently palatable
 - i. Maybe create as a service?
 - ii. Ingest tools could be smarter (e.g. pulling DOI data)
 - d. Shapes provide for expectations in the UI
 - e. not all data in the triplestore are not represented in shapes
 - i. ability to create custom shapes?

Andrew: Can we align local priorities with the core development priorities?

(We're all friends)

Ralph: Focusing on core stuff and will move to local later

Andrew: Trying to wrap up sprint work that remains from past sprint. VIVO scholars task force has own sprint underway focusing on read only UI - and this is in line with the work for this sprint. Pattern: extracting data from VIVO into externalized search index and then UI built off that index.

Entities. Where it's at. Expectations around UI.
