

2019-07-01 Sustainability WG Agenda and Notes

Date

28 Jun 2019

Attendees

- [John Kunze](#)
- [Kate Wittenberg](#)
- [Brian McBride](#)
- [Kurt Ewoldsen](#)
- Roger Schonfeld

Goals

- discuss initial survey results (22 respondents out of 32):
 - link to [report](#)
 - link to [analysis](#)

Discussion items

Time	Item	Who	Notes
	announcements		
	survey discussion		<p>Survey report results as of last Friday; 22 responses out of 32 (66% response rate). Next round of survey to go out to NAAN registrants.</p> <p>RS: will there be any changes to the survey? Answer: Yes, if we wish.</p> <p>KW: need to make clear in question about org size how many people in your business are you aware of that use ARKs (eg, participants, employees); ie, how many people actually depend on ARKs?</p> <p>KE: what is the question that we really want answered?</p> <p>RS: Regarding 54% don't assign ARKs, perhaps the question should have three response choices: yes; no, we never have; no, but we used to</p> <p>RS: for Q8, concerned that so few people indicated LYRASIS or DuraSpace membership, which calls into question the strategy of hosting AITO with those organizations; should rework this question because we can't tell who is really "no"; how about</p> <ul style="list-style-type: none">* only L* only D* both L and D* neither* don't know <p>Q9 Priorities</p> <p>RS: very clear marching orders, seldom is it this clear; shows that promoting ARK understanding and usage is high priority; what is the timing of the next survey? answer: 3 weeks</p> <p>RS: perhaps the starting assumption that for next round, is that orgs will have less current engagement with ARKs</p> <p>JK: results may be skewed by expressions of interest compared to those who have registered; also, some key EOI people didn't fill out the survey</p> <p>RS: let's make sure questions are designed to capture best info, eg, why did you register to use ARKs?</p> <p>For next meeting's agenda</p> <ul style="list-style-type: none">* new questions or changes to existing questions for next* how do we distinguish between people who are less engaged or more engaged?
