Data Curation: Existing Tools and Related Technologies

[ICPSR Content Models for Social Science Data](#) . This is a link to a handful of blog posts, each documenting a CMA Content Model object for storing content related to social science data and documentation. As part of an NSF INTEROP grant we will be continuing to refine these objects, and will also publish associated CMA Service Definition and Service Deployment objects. And, we will also create and publish technology for encapsulating content published in the Data Documentation Initiative (DDI) XML schema in FOXML for ingest by Fedora.
