2019-09-16 iPRES Fedora Tutorial

For the past several years the Fedora community has prioritized alignment with linked data best practices and modern web standards. We are now shifting our attention back to Fedora's digital preservation roots with a focus on durability and the Oxford Common File Layout (OCFL). This tutorial will provide an introduction to the latest version of Fedora with a focus on digital preservation functionality and workflows.

When

16 September 2019
