Welcome to the DSpace Wiki! Please [sign up](#) and [participate](#).

Although a few pages are 'locked' to prevent spamming, anyone who [sign ups and creates an account](#) can freely edit most of the DSpace Wiki. If you've forgotten your password, please visit the [reset your password](#) page.

This space is thought to make it easy for DSpace users in Nigeria to share information about their activities, projects, events and ideas and to make them known to the global DSpace Community. In Nigeria there are many DSpace installations and a vibrant community of users within the AULNU, NLA and NiCLOR communities of librarians and researchers. This page and its sub-pages are the platform to coordinate the collaboration among Nigerian institutions in order to facilitate discussions on Country specific themes and topics of interest.

## 1. Who is using DSpace in Nigeria?

In the Duraspace Registry there are information about the DSpace installations currently running in Nigeria. Please take a moment to look for your Institution and check whether the information is correct. If your institution is missing, you can add it here: <https://duraspace.org/registry/register-your-site/>

## 2. How to communicate?

There are numerous ways to get in touch, both at a global level with the general DSpace Community and at the specific country level.
