Regression Testing

Task	bb	db	nw
Perform Regression Tests			
Use ZAProxy to perform a security analysis Use a test DuraCloud account with very little content Start a Manual Explore, log in to DurAdmin, perform an "Active Scan" Remove any sites not relevant to DuraCloud from the "Sites" list Generate an HTML and XML report and attach to this page		duracloud-6.1.0-zaproxy-report.html	

Build Tests

Test	bb	db	nw
mvn clean install (full build + integration tests) - DuraCloud	1 Integration tests fail frequently due to a "space already exists" error. See issue #2.	 (Two tests failed, but upon further investigation it was clear that they were false positives) 	
	✔ After all updates applied		

Release Actions - for each baseline (in this order): DB, DuraCloud, MC, Snapshot, Mill

- Complete testing
 Perform version release (v6.1.0): https://github.com/duracloud/deployment-docs/blob/master/release-new-version.md
 Deploy release zip to production Beanstalk
 Create release notes in Github
 Undet deputate in Github

- Update documentation
 Update download links to point to Github release
