

2009-11-03 - Committer Meeting

Time/Place

This meeting is a hybrid teleconference and IRC chat. Anyone is welcome to join...here's the info:

- Time: [11 am Eastern Standard Time US \(GMT-5\)](#)
- Voice
 - [Via Skype:](#)
 - Dial from anywhere: \+9900827047086940 (callto://+9900827047086940)
 - [Via Phone:](#)
 - US Number: +1 (201) 793-9022
 - Enter Room Number: **7086940**
- IRC:
 - [Join the #duraspace chat room via Freenode Web IRC](#) (enter a unique nick)
 - Or point your IRC client to #duraspace on irc.freenode.net

Agenda

- [Alternative REST Proposal](#) (Asger)
 - Status, relationship with transaction support
 - Timing vs. 3.3
- 3.3 Status
 - New issue: [FCREPO-567](#): Maven target for distribution
 - Other outstanding issues needing discussion?
- [Review submitted issues](#)

Audio and Chat Log

- [Download mp3](#) (48MB, ~1.5 hours)

Relevant excerpt from duraspace.org/irclogs:

[11:28] <Dan_Davis> Eddie, if you look in the top-level fedora-repository/pom.xml you will see a duraspace-releases and a duraspace-thirdparty repository specifications. Trippi et. al. would go into duraspace-releases. It would also be great to Mavenize gsearch.
[12:22] <barmintor__> so update- POST /objects/demo:29/datastreams/RELS-EXT?[update=]
[12:22] <barmintor__> and add- PUT /objects/demo:29/datastreams/RELS-EXT?[update=]

Chris' Notes re:RESTful Relationship API

The following are my raw notes from this portion of the meeting. I used these to write up the [RESTful Relationship API page](#) - Chris

HTTP PUT/POST to RELS-EXT/INT.

SPARQL Update

URL Parameter, "kind of update" (possibly could be trigger)

....could be alternative to mime type (some clients can't control headers well)

Validation would happen.

Have it use fedora-system:sdef...accept a POST.

Doesn't require that we do it in the general case.

PUT should be idempotent (to replace the entire datastream)

POST has no such requirement (so to add/delete specific relationships)

Important: Make sense of it for users
