

DSpace Release 1.6.1 Notes

Version 1.6.1

We invite developers to help with the next maintenance release of DSpace. DSpace 1.6.1 is a bug fix release to resolve any issues located within DSpace 1.6.0 (see [DSpace Release 1.6.0 Notes](#)). Contributors are strongly encouraged to obtain the source code using SubVersion. This is very straightforward, and we've published a guide to doing so here: [Code Contribution Guidelines](#)

Installation Documentation

The DSpace System Documentation is available from our list of [DSpace Resources](#).

Organizational

Release Coordination

- **Primary Release Coordinator:** Kim Shepherd

Timeline and Proceeding

Release Timeline:

- *May 14, 2010* : **Code Freeze** – No new 1.6.1 code/fixes should be added after this date, unless formally approved by the Release Coordinator.
- *May 21, 2010* : **1.6.1 Release Day**

Release Process needs to proceed according to the following Maven release process: [Release Procedure](#)

New Features/Changes

1.6.1 is a bug-fix only release. This means it will include **no new features** and only includes fixes for bugs which were found in the 1.6.0 release.

Changes

Changes which are currently marked for release in 1.6.1 are available on the [1.6.1 Release page in Jira](#)

Known Issues in 1.6.1

See: <http://jira.dspace.org/>
