

Fix ???some.key.name??? (JSP)

Fix ???some.key.name???

The Messages.properties file has name and value pairs separated by the equal sign. The name is a dot separated set of labels, in some cases this name is replaced by the value for the labeling of buttons in the jsui web interface.

```
jsp.adminhelp = Admin Help...
jsp.administer = Administer
jsp.admintools = Admin Tools
```

Fix for DSpace 1.4.2 and earlier versions

Files:

- [dspace-source]/config/language-packs/Messages.properties
- [dspace-source]/jsp/local/ (JSP producing ???some.key.name??? text)

Instructions:

1. Search for the string inside the question marks in the Messages.properties file.
2. Search for the same string inside the JSP; it should be the value of a key attribute to a <fmt:message> element. If both the JSP and Messages.properties appear to contain the string, be sure the strings match exactly.
3. If Messages.properties does not contain the string, add it: some.key.name=Text that should appear
4. Perform the steps in [Rebuild DSpace](#).

Fix for DSpace 1.5.0 and later

Files:

- [dspace-source]/dspace-api/src/main/resources/Messages.properties
- [dspace-source]/dspace-jsui/dspace-jsui-webapp/src/main/webapp (JSP producing ???some.key.name??? text)

Instructions:

1. Add the missing line to the Messages.properties file
2. Copy & edit file. Look for the original Messages.properties file in
 - [dspace-source]/dspace-api/src/main/resources/Messages.properties
 - NOTE: IF you don't have the DSpace Source Code installed locally, you can also download this file via the web. Visit the below site, and browse to the proper **version** of DSpace, then follow the path (see above) to the proper sub-directory to download the original file.
 - <http://scm.dspace.org/svn/repo/dspace/tags/>
3. Copy the original Messages.properties file to this location in your local DSpace install. (NOTE: You may need to create the 'src/main/resource/' directory, as it doesn't exist by default):
 - [dspace-source]/dspace/modules/jsui/src/main/resources
4. Add the missing line to Messages.properties. For example, if the text you say is ???my.key.name??? then add

```
my.key.name = The Text to Display
```

5. If necessary, you may also wish to copy/change the original JSP file. The original can be found at: [dspace-source]/dspace-jsui/dspace-jsui-webapp/src/main/webapp/
 - generally put changes in here to keep original files intact (again, you may need to create the src/main/webapp directory if it doesn't exist): [dspace-source]/dspace/modules/jsui/src/main/webapp
6. Perform the steps in [Rebuild DSpace](#).
