

Remove Scrollbar

Affected files

header-default.jsp

Instructions

If you get annoyed by the horizontal scroll bar at the bottom, getting rid of it is actually quite easy.

Look for

```
<table class="centralPane" width="100%" cellpadding="3" border="0">
```

in header-default.jsp.

Just change the 100% to 99% and you'll be rid of the horizontal scroll bar.
