2020-10-22 DSpace 7 Working Group Meeting

- Date
- Agenda
- Attendees
- 7.0 Release Goals
- Current Work
 - Project Board
 - Security / Performance Tests
 - Delayed / Needs Discussion
- Notes

Date

22 Oct 2020 from 14:00-15:00 UTC

Location: https://lyrasis.zoom.us/my/dspace (Meeting ID: 502 527 3040). Passcode: dspace

Beta 5 Sprint : Ongoing

- Planning Sprint for Beta 5
- DSpace 7 Project Boards
- View PRs assigned to you for review/testing: https://github.com/pulls/review-requested

Agenda

- (BEFORE MEETING IN #dev-sprint) Developer Stand Up Developers give brief updates on their effort (or their team's effort).
 - Update/see "Current Work" section below based on your status. Please feel free to update prior to meeting.
 - Please highlight any new work (needing reviews/testing), any blockers (for you), and any discussion topics you may have.
- (25 mins) General Discussion Topics
 - 1. (10mins) Beta 5 Estimation: Reviewing what is left to estimate & setting goals/deadlines as needed
 - a. https://github.com/orgs/DSpace/projects/4?card_filter_query=label%3A%22Estimate+TBD%22
 - (15mins) "Workflow Actions refresh entire MyDSpace page instead of just WorkflowItem" https://github.com/DSpace/dspace-angular /issues/721
- (35 mins) Planning for Beta 5
 - Review of our Beta 5 Project Board & assigning issues for estimation which have Estimate TBD label
 - Beginning to assign work

Attendees

- Art Lowel (Atmire)
- Andrea Bollini (4Science)
- Tim Donohue
- Lieven Droogmans
- Giuseppe Digilio (4Science)
- Ben Bosman
- Paulo Graça

7.0 Release Goals

These resources define the prioritization and general schedule we are working towards

- DSpace 7 Release Goals : overview of goals/timelines & beta release process
- DSpace 7 Release Plan spreadsheet: our planning spreadsheet which details which features are scheduled for each Beta release.

Current Work

Project Board

DSpace 7.0 Beta 5 Project Board: https://github.com/orgs/DSpace/projects/4

To quickly find PRs assigned to you for review, visit https://github.com/pulls/review-requested (This is also available in the GitHub header under "Pull Requests Review Requests"

Security / Performance Tests

Brainstorming options for security testing & performance testing. How do we want to handle both of these prior to 7.0 final?

- 1. Security Review/Scanning of pre-7.0
 - a. Is Testathon an opportunity to have a third-party do a security review and/or scan of the codebase? If so, any ideas of who could do this work?
 - b. Ideally, we build security tests into Integration Test framework to ensure we are checking permissions at all times
 - i. In March 2020, 4Science did an analysis of existing IT security coverage (as part of DS-4411) here: https://docs.google.com/document/d/13DMZ1iYE04D_6_8IrnHrl0uqKkz5RqMU6tWJMrHv88Y/edit
 - ii. An update to this analysis could be performed, concentrating on any new gaps.
 - c. Other ideas?
- 2. Performance testing of pre-7.0
 - a. Again, is this an opportunity for Testathon? How/Where do we find someone with a large scale DSpace to test pre-7.0 with? (There's also Chris Wilper's JMeter scripts from 2019 which might be able to provide some basic feedback here)
 - b. Ideally, again it'd be nice if we could perform this sort of analysis in a more automated/regular basis (perhaps via Integration Tests which load a lot of dummy data?).
 - c. Other ideas?

Delayed / Needs Discussion

- Finalize / approve the initial list of all authorization features which we should implement for the /api/authz/features REST endpoint. This list of
 features should be limited to only features which are required to enable/disable User Interface functionality. (In other words, we can always add
 more features in the future. We just need to approve the list necessary for 7.0)
 - i. Review current spreadsheet (from Andrea Bollini (4Science)): https://docs.google.com/spreadsheets/d

/1182LcD WqIZRbUGWpLtBw0aOMR9jhbOVB7GZqtTpR9A/edit?usp=sharing

- 1. Art Lowel (Atmire): I don't see any immediate issues with the current set of features, but I would prefer a consistent naming scheme. I'd use canDoSomething for everything
- 2. Tim Donohue added possible renames of these features based on Art's idea (see cell comments in spreadsheet). I like the "can[DoSomething]" naming scheme as well.
- 2. (REST Contract) Edit Homepage News: https://github.com/DSpace/Rest7Contract/pull/45
 - a. Delayed. General agreement (in meeting on March 21, 2019) that storing HTML in metadata fields is not really ideal behavior. Metadata (from a librarian standpoint) tends to be free of format-related markup (as that allows for easier sharing, understanding of metadata. Currently Community & Collection homepage information is HTML-based and is stored in metadata that is appropriate for a minor subset of information (like the title) but it is better to move large/rich text to bitstreams.
 - b. Proposal here is to consider storing HTML-based markup (for Site, Community & Collection homepages) in Bitstream(s) associated with the object in question. May allow for more CMS-lite behavior in the future
 - c. Timeline for this is uncertain. Possibly in 7 or 8. May depend on how/whether it can be scoped.

Notes
